

FINAL

Phase I Environmental Site Assessment Report Parcel 467-04-20ST, -22ST, -23ST 801 H Street (aka 735, 739, 741 H Street) Fresno, CA

Prepared for:

Successor Agency to the Redevelopment Agency of the City of Fresno USEPA Brownfields Assessment Grant USEPA Grant: BF-00T71101

Prepared by:

URS Corporation 30 River Park Place West, Suite 180 Fresno, California 93720

> URS Corporation Job No. 18715320

> > July 2014

Executive Summary

URS has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of three (3) parcels comprising approximately 5.5 acres of land located in Fresno, Fresno County, California. The combined parcels consist of a parking lot located at 801 H Street between Mono Street to the south and Kern Street to the north, and a warehouse with multiple addresses facing H Street to the east. The APNs are 467-04-20ST, 4.32 acre parking lot; 467-04-22ST, 0.65-acre parking lot; and 467-04-23ST, 0.54 acres with a warehouse having three addresses: 735, 739, and 741 H Street. The parcels are referenced in this ESA as -20ST, -22ST, and -23ST respectively.

Based on a review of historical documents, parcel APN -20ST has been developed as a parking lot for commercial use since the late 1990s. Between the late 1980s and the late 1990s the parcel was vacant. Prior to the 1980s the parcel consisted of several railroad spur lines used to service lumber, paper, and produce warehouses located on parcels APN -22ST and -23ST. Parcel -22ST consisted of warehouses and commercial development until the early 1980s. The parcel was vacant in the 1980s and developed into a parking lot in the late 1990s. The warehouse currently occupying parcel APN -23ST is visible in aerial photographs back to at least 1946 and other historical documents back to at least 1885.

This assessment has revealed no evidence of recognized environmental conditions or historical recognized environmental conditions in connection with the subject property.

There are 22 historical dry cleaning sites located from 0.011 to 0.234 miles up-gradient of the subject property. Given the number and location of these Historical Cleaners, it is possible that groundwater beneath the subject property has potentially been impacted by past unauthorized discharges from these facilities.

For reasons discussed in Section 8.2, it is URS' opinion that there is a low likelihood that significant environmental liability exists regulated to the historical activities of the historical dry cleaning sites located up-gradient of the subject property.

Based on the date of construction, URS requested an asbestos and lead-based paint survey from a private subcontractor, T. Brooks and Associates of Clovis, California, for the warehouse located on parcel APN 467-04-23ST (aka 735, 739, 741 H Street). The methodology and results of the survey are presented under separate cover and entitled Asbestos Survey & Lead-Based Paint Inspection Report, Commercial Structure 735, 739, &741 "H" Street, Fresno, California, dated May 28, 2014.

The survey concluded, in part, that 20 samples collected by Brooks for analysis included one or more layers which tested positive for asbestos in amounts greater than 1.0 percent. The samples testing positive included drywall taping mud and texture, drywall texture, wall paneling, 9-inch x 9-inch vinyl floor tile and associated mastic, and vibration damper.

The survey concluded, in part, that the majority of testing combinations considered as part of Brook's investigation were found to contain lead in some amount. A total of 47 testing combinations on the interior surfaces and 4 exterior surfaces were found to include lead in excess of 1.0 milligrams per square centimeter $(mg/cm^2)(0.5\%)$, (5,000 parts per million) and would be classified as "Lead-Based Paint" (LBP) under state and federal regulations.

Therefore, it is URS' opinion that ACMs and LBPs are items of concern for the subject property. Suspect asbestos-containing materials (ACMs) should be formally assessed by a certified asbestos consultant prior to any renovation or demolition which may disturb such materials. Confirmed ACMs should be handled by a licensed asbestos contractor and appropriately disposed of. Painted surfaces which are in good condition do not require any action. However, if the painted surfaces are abated, certain waste disposal practices are required. Suspect paint should be formally assessed by a certified lead materials inspector prior to any renovation or demolition that may disturb such materials. Activities that may disturb confirmed LBP should be handled under the supervision of a certified lead materials inspector.

1.0 INTRODUCTION

1.1. Purpose

This report documents the methods and findings of a Phase I Environmental Site Assessment (ESA) conducted by URS Corporation (URS) for the Successor Agency to the Redevelopment Agency of the City of Fresno (Agency, Client). The purpose of the Phase I was to evaluate environmental conditions associated with the subject property and neighboring properties and assess whether any recognized environmental conditions (RECs) exist at the subject property.

1.2. Detailed Scope of Services

The scope of services consisted of visual observation of site conditions during a site visit; review of practically reviewable and reasonably ascertainable information on historical site usage, and surface and subsurface conditions; and review of information provided by individuals, public agencies, and others. The services provided by URS were performed under a written contract with the Agency, and authorized by the Agency's Notice to Proceed dated February 27, 2013. Authorization to proceed with this Phase I ESA was received by email on April 17, 2013 from Mr. Enrique Mendez, representing the Agency.

The following specific tasks were performed by URS:

- Reviewed pertinent, available documents and maps regarding local physiographic and hydrogeologic conditions in the vicinity of the subject property;
- Reviewed and interpreted available historical sources (e.g., topographic maps, Sanborn Fire Insurance maps, aerial photographs, city directories) of the subject property and immediate vicinity from readily available sources;
- Reviewed available documents regarding past and/or current site development (e.g., previous environmental and geotechnical investigations, site maps, environmental permits, records of hazardous materials generation, use, storage and/or disposal);
- Reviewed a database report of available federal, state, and local agency lists including, but not limited to: (a) known or potential hazardous waste sites or landfills; (b) sites currently under investigation for environmental violations; (c) sites which manufacture, generate, use, store, and/or dispose of hazardous materials or hazardous waste; (d) sites which have underground storage tanks (USTs); and (e) sites with recorded violations of regulations concerning USTs and hazardous materials/hazardous wastes. This task was intended to identify whether the subject property is listed or whether facilities in the area may have impacted environmental conditions at the subject property;
- Performed a reconnaissance survey of the subject property to make visual observations of existing conditions and activities, and performed a drive-by survey of the area within an approximate one-half-mile radius of the subject property to observe general land uses within the search area;
- Conducted interviews with the subject property owner, occupant, manager, and/or others knowledgeable, as appropriate, regarding history and operations at the subject property;
- Conducted inquiries with applicable federal, state, and municipal regulatory agencies for information regarding building or environmental permits, environmental violations or incidents, and/or status of enforcement actions at the site; and
- Prepared this Phase I ESA report describing the investigation performed and presenting URS' findings, professional opinions, and recommendations regarding the potential for environmental contamination at the subject property.

Additional work scope elements included:

- A visual review of wetlands was made during the site reconnaissance, including looking for saturated soils, wetland-type vegetation, or fill areas. In addition, Federal Emergency Management Agency (FEMA) Flood Maps and zoning records were reviewed and findings are included in this report; and
- An evaluation of the potential for elevated indoor radon levels based upon review of the National Radon Database developed by the U.S. Environmental Protection Agency (USEPA) and readily available.
- URS requested an asbestos and lead-based paint survey from a private subcontractor for the warehouse located on parcel APN 467-04-23ST (aka 735, 739, 741 H Street).

1.3 Significant Assumptions

No significant assumptions were made as part of this Phase I ESA.

1.4 Limitations and Exceptions

URS conducted this Phase I ESA in general accordance with the ASTM Standard Practice for Environmental Site Assessments: Phase I Site Assessment Process (E 1527-05) and the USEPA's Standards and Practices for All Appropriate Inquiries: 40 CFR Part 312 (AAI). However, uncertainty is not wholly eliminated when conducting Phase I ESAs, and the investigations are not exhaustive. The environmental professionals involved used reasonable limits of time and cost when performing the work.

Deviations from the standard scope of services that occurred during the performance of this Phase I ESA are discussed in detail in Section 10.0.

1.5 Special Terms and Conditions

This Phase I ESA was not subject to any special terms or conditions.

1.6 User Reliance

This Phase I ESA report is intended solely for the use of Agency for the purpose indicated in Section 1.1.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property consists of three (3) parcels comprising approximately 5.5 acres of land located in Fresno, Fresno County, California (subject property). The combined parcels consist of a parking lot located at 801 H Street between Mono Street to the south and Kern Street to the north, and a warehouse with multiple addresses facing H Street to the east. The County Assessor's parcel numbers (APNs) are 467-04-20ST, 4.32 acre parking lot; 467-04-22ST, 0.65-acre parking lot; and 467-04-23ST, 0.54 acres with a warehouse having three addresses: 735, 739, and 741 H Street. A Site Location Map is presented as Figure 1. The parcels will be referenced in this ESA as -20ST, -22ST, and -23ST respectively.

2.2 Site and Vicinity General Characteristics

Based on a review of historical documents, parcel APN -20ST has been developed as a parking lot for commercial use since the late 1990s. Between the late 1980s and the late 1990s the parcel was vacant. Prior to the 1980s the parcel consisted of several railroad spur lines used to service lumber, paper, and produce warehouses located on parcels APN -22ST and -23ST. Parcel -22ST consisted of warehouses and commercial development until the early 1980s. The parcel was vacant in the 1980s and developed into a parking lot in the late 1990s. The warehouse currently occupying parcel APN -23ST is visible in aerial photographs back to at least 1946 and other historical documents back to at least 1885.

The Site is located in an area currently zoned M-1 (Light Manufacturing). Based on the neighborhood reconnaissance, the area is characterized by mixed uses, including predominantly retail and commercial development and government office buildings. Chukchansi Park Stadium is located northeast of the parcels. Photographs of the Site are provided in Appendix A.

2.3 Current Use of the Site

The subject property parcels APN -20ST and -22ST are currently utilized as a commercial parking lot operated by Ace Parking Management, City of Fresno Parking "Stadium Lot." Parcel APN - 23ST is a warehouse with three separate spaces: 735 H Street occupied by the Fresno County Economic Opportunities Commission used to store office furnishings, office supplies, and boxes of records and files; 739 H Street occupied by Work Force Connections (office furnishings supply); and 741 H Street occupied by Zacky Farms and used to store miscellaneous office supplies.

2.4 Description of Structures, Roads, and Other Improvements

The subject property parcels APN -20ST and -22ST are an asphalt-paved commercial parking lot with no significant improvements other than a guard shack, parking stall stripping, and several lighting fixtures surrounded by a block wall and chain link fence. Parcel APN -23ST is a warehouse with three separate spaces. The warehouse is constructed of white-washed red brick masonry; concrete slab over wood floor with basement spaces; the roof is wooden trusses and joists overlaid with plywood sheeting and built-up asphaltic roofing material and mastic compound. Sub-suites within the warehouse formerly used for office space are wood-frame construction with gypsum board or plaster wall finish.

2.5 Current Use of Adjoining Properties

URS observed the following features of neighboring properties at the time of the site visit. Our evaluation of these properties was limited to conditions visible from the site and from public rights-of-way.

Northeast:	H Street; then commercial buildings (vacant and an auto repair facility), Inyo Street and Chukchansi Park Stadium.
Southeast:	Mono Street and commercial buildings (warehouse and distribution center).
Southwest:	Mono Street and Union Pacific Rail Road tracks; vacant lots.
Northwest:	Kern Street; then a Fresno Fire Department structure and parking lot.

3.0 USER-PROVIDED INFORMATION

3.1 Title Records

URS obtained property title information from the County of Fresno Tax Assessor. The subject property is owned by the Successor Agency to the Redevelopment Agency of the City of Fresno.

3.2 Environmental Liens or Activity Use Limitations

URS requested information related to environmental liens and activity or use limitations (AULs) from Environmental Data Resources, Inc. (EDR). EDR was not able to provide any information regarding environmental liens or AULs for the subject property. A copy of the Environmental Lien Search Report is included as Appendix B.

3.3 Specialized Knowledge

URS submitted a User Questionnaire per AAI standards to Mr. Enrique Mendez, representing the Agency, regarding specialized user knowledge of the subject property. Mr. Mendez stated that, to the best of his knowledge, there are no known environmental concerns associated with the subject property, and that there are no environmental liens or activity or use limitations associated with the subject property.

3.4 Commonly Known or Reasonably Ascertainable Information

URS requested whether the Agency was aware of any commonly known or reasonably ascertainable information within the local community about the subject property that might result in the finding of a REC in connection with the subject property. Mr. Mendez was not aware of any such information.

3.5 Valuation Reduction for Environmental Issues

URS requested whether the Agency is aware of any reduction in value of the subject property that might be associated with the finding of a REC in connection with the subject property. Mr. Mendez was not aware of any such reduction in value.

3.6 Owner, Property Manager, and Occupant Information

The Successor Agency to the Redevelopment Agency of the City of Fresno is the owner of the subject property. Ace Parking Management, Inc. operates the parking facility that occupies the subject property, City of Fresno Stadium Lot. Ace Parking manages more than 450 locations throughout the southern and western United States. The regional office is located at 2125 Kern Street, suite #101, Fresno, CA 93721 (559-264-6422). According to representatives of ACE Parking contacted by telephone, no activities are conducted on the subject property that represents a potential recognized environmental concern.

3.7 Reason for Performing this Phase I ESA

The Agency wants an assessment of recognized environmental concerns (RECs); historical recognized environmental conditions (HRECs) and items of concerns (IOCs) that may be present on the subject property.

4.0 **RECORDS REVIEW**

URS contracted with EDR to conduct a review of applicable regulatory agency lists of known and potential hazardous waste sites, properties or facilities currently under investigation for potential environmental violations, and those sites storing or using hazardous materials. URS utilized the ASTM Standard with respect to list search radii for Phase I ESAs (ASTM E 1527-05). Documents and lists were reviewed to identify properties or facilities located within the site vicinity that may have the potential to adversely impact environmental conditions at the Site. The complete list of reviewed databases is provided in the EDR report, included in Appendix C, and is summarized in the following table.

4.1 Standard Environmental Records Sources

The following table presents the EDR database report results for the standard environmental records.

Agency Database	Survey Distance	Number of Sites Identified
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	0.5 miles	3
CERCLIS No Further Remedial Action Plan (CERCLIS NFRAP)	0.5 miles	2
U.S. EPA RCRA Registered Treatment Storage and Disposal (RCRA-TSDF)	0.5 miles	1
U.S. EPA RCRA Registered Large Quantity Generators of Hazardous Waste (RCRA-LQG)	0.25 miles	0
U.S. EPA RCRA Registered Small Quantity Generators of Hazardous Waste (RCRA-SQG)	0.25 miles	7
U.S. EPA RCRA Registered Conditionally Exempt Small Quantity Generators (RCRA-CESQG)	0.25 miles	0
State Site Mitigation and Brownfields Reuse Program (ENVIROSTOR) database	1.0 miles	9
State Leaking Underground Storage Tank (LUST) List	1.0 miles	47
State Spills, Leaks, Investigation & Cleanup Cost Recovery Listing (SLIC)	0.5 miles	4
State Underground Storage Tanks (UST) Lists	0.25 miles	2
Voluntary Cleanup Sites	0.5 miles	2
State Listing of Recycling Facilities (SWRCY).	0.5 miles	1
HIST Cal-Sites	1.0 miles	1
State Facility Inventory Database (CA FID UST) of historic active and inactive UST locations	0.25 miles	21
State Hazardous Substance Storage Container Database (HIST UST) of historic UST sites	0.25 miles	19
Statewide Environmental Evaluation and Planning System (SWEEPS UST)	0.25 miles	24
U.S. EPA RCRA Non Generators	0.25 miles	0
Hazardous Substance Cleanup Bond Act (CA BOND EXP. PLAN)	1.0 miles	1
State Historical Hazardous Waste and Substances Sites (HIST CORTESE)	0.5 miles	26
CUPA Listings	0.25 miles	62
Proposition 65 Records (Notify 65)	1.0 miles	1
Cleaner Facilities (DRYCLEANERS)	0.25 miles	0
Permitted Hazardous Waste Facilities Database (HWP)	1.0 miles	2
EDR Proprietary Manufactured Gas Plants (MGP)	1.0 miles	1
EDR Exclusive Historic Gas Stations (US Hist Auto Stat)	0.25 miles	117
EDR Exclusive Historic Dry Cleaners (US Hist Cleaners)	0.25 miles	52

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the subject property or adjacent to the subject property for the following key databases:

- National Priority List
- Federal RCRA CORRACTS Facilities List
- Federal Institutional Controls/Engineering Controls Databases
- Federal ERNS List
- State and Tribal Equivalent NPL (RESPONSE)
- State and tribal landfill and/or solid waste disposal site lists (SWF/LF)
- Toxic Pits Cleanup Act Sites
- CDL Clandestine Drug Labs
- US HIST CDL National Clandestine Laboratory Register
- HMIRS Hazardous Materials Information Reporting System
- CHMIRS California Hazardous Material Incident Report System
- LDS Land Disposal Sites Listing
- Cortese Hazardous Waste & Substances Sites List
- SPILLS 90 data from FirstSearch
- HAZNET Facility and Manifest Data

Based on groundwater monitoring data from a nearby site, regional groundwater is expected to flow to the north/northeast (see Section 4.3). Therefore, sites south or southwest of the subject property are considered to be up-gradient with respect to groundwater flow direction.

The following sites, including those in the Orphan Summary, were identified within the ASTM-specified search distance for each of the public databases reviewed:

LUST Listing

A review of the LUST list, as provided by EDR has revealed that there are 47 LUST sites within approximately 0.5 miles of the subject property. Forty five of the LUST sites are closed sites and therefore are not expected to have a significant negative environmental impact on the subject property. One of the open LUST sites is listed as "inactive." Archive Record Storage is over 800 feet down-gradient of the subject property. One open LUST site, Abandoned Gasoline Station, 655 G Street, is 455 feet up-gradient and under Site Assessment. Based on the closed status, distance from the subject property, status of remediation of the sites, and a review of the status of these sites on the State's GeoTracker database, none of the State LUST cases is considered a REC for the subject property.

CERCLIS

A review of the CERCLIS list, as provided by EDR, has revealed that there are 3 CERCLIS sites within approximately 0.5 miles of the subject property. The three sites listed appear to be one unique location. The PG&E Gas Plant - Fresno site is located 0.234 miles west/northwest (cross-gradient) from the subject property with no violations reported. Based on this information, this site is not expected to have a significant negative environmental impact on the subject property, and therefore is not a REC for the subject property.

RCRA Small Quantity Generators of Hazardous Waste (RCRA-SQG)

A review of the RCRA-SQG list, as provided by EDR, has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the subject property. No violations are reported for these

sites. Therefore, these listings are not expected to have a significant negative environmental impact on the subject property, and are not considered RECs for the subject property.

SLIC Listing

A review of the SLIC list, as provided by EDR, has revealed that there are 4 SLIC sites within approximately 0.5 miles of the subject property. None of the four sites are expected to have a significant negative environmental impact on the subject property due to inactive status, closed investigation status, distance, and/or groundwater flow direction, and are not considered RECs for the subject property.

State UST Lists (CA FID UST, UST, HIST UST, SWEEPS UST)

A review of the CA FID UST, UST, HIST UST, SWEEPS UST and SWEEPS UST lists, as provided by EDR, has revealed that there are 27 unique UST sites within approximately 0.25 miles of the target property. Those sites with reported leaks are listed in the LUST or SLIC databases and were discussed above. The remaining sites are not listed in other databases indicating a release, spill, or other violation and therefore they are not expected to have a significant negative environmental impact on the subject property and are not considered RECs for the subject property.

ENVIROSTOR database

A review of the ENVIROSTOR list, as provided by EDR, has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the subject property. Eight of the nine sites are up-gradient to the subject property. One of the sites, Valley metal Finish 733 G Street, is located 384 feet up-gradient of the subject property with no violations reported. None of the nine sites on the ENVIROSTOR list are considered RECs for the subject property due to NFA status, closed investigation status, distance, and/or being located cross- or down-gradient relative to the subject property.

State Historical CORTESE List (HIST Cortese)

A review of the HIST CORTESE list, as provided by EDR, has revealed that there are 26 HIST CORTESE sites within approximately 0.5 miles of the target property. Twenty four of the sites are closed LUST cases. Closed sites are not expected to have a significant negative environmental impact on the subject property and therefore these sites are not considered RECs. The 2 remaining sites, are discussed in the LUST database section above, and are not expected to have a significant negative environmental impact on the subject property due to distance or their location cross- or down-gradient relative to the subject property and therefore are not considered RECs for the subject property.

Other Databases

Additional databases with sites listed in the proximity of the subject property include:

- Voluntary Cleanup Sites (VCP) PG&E Manufactured Gas Plant at 1131 G Street is not a REC and is discussed in the CERCLIS section;
- State Listing of Recycling Facilities (SWRCY) Buy Back Inc. at 1435 Fresno Street is listed and is not considered an REC due to distance (0.330 miles) and lack of violations;
- Historical California potential hazardous substance sites (HIST Cal-Sites) PG&E Manufactured Gas Plant/Substation at 1131 G Street is not a REC and is discussed in the CERCLIS section above;

- Notify 65 Ace Service, Inc. at Broadway and Ventura Street is located 0.068 miles from the subject property and cross-gradient. Based on the distance and cross-gradient position of the site relative to the subject property, it is not considered a REC for the subject property;
- Permitted Hazardous Waste Facilities (HWP) Databases VOPAK USA Incorporated (formerly Van Waters and Rogers) is located at 1152 G Street and is under remediation for tetrachloroethene (PCE) contamination to soil and groundwater. The site is located 0.234 miles cross-gradient in relation to the subject property. Two monitoring wells associated with the VOPAK site are located at the north end of the subject property. According to the State GeoTracker Database, data from this well submitted to the State Water Resources Control Board in June 2008 indicated that the well was non-detect for all volatile organic compounds including PCE. Based on this information, this listing is not expected to have a significant negative environmental impact on the subject property, and is not considered a REC for the subject property. Source One Healthcare is located at 223 Broadway, or about 0.448 miles cross-gradient with no violations. Based on this information, this listing is not expected to have a significant negative environmental impact on the subject property, and is not considered a REC for the subject property. Source One Healthcare is located at 223 Broadway, or about 0.448 miles cross-gradient with no violations. Based on this information, this listing is not expected to have a significant negative environmental impact on the subject property, and is not considered a REC for the subject property.
- DRYCLEANERS and EDR US Historical Cleaners A review of the EDR US Historical Cleaners list, as provided by EDR, has revealed that there are 52 US Historical Cleaners sites within approximately 0.25 miles of the subject property. Six of the fifty two sites are adjacent to the subject property to the east (cross-gradient). Twenty four of the sites are located down- or cross-gradient to the subject property. The remaining 22 sites are located from 0.011 to 0.234 miles up-gradient. Given the number and location of these Historical Cleaners, it is possible that groundwater beneath the subject property has potentially been impacted by past unauthorized discharges from these facilities.
- Hazardous Substance Cleanup Bond Act (CA BOND EXP PLAN) The Fresno County Employee's Credit Union site at 2211 Merced Street is a closed LUST site and is located 0.488 miles down-gradient and therefore is not considered a REC for the subject property;
- Manufactured Gas Plants PG&E Manufactured Gas Plant at 1131 G Street is not a REC and is discussed in the CERCLIS section above.

Orphan List

A review of the Orphan List did not identify any contaminated sites recognized as near the subject property.

4.2 Historical Use Information on Subject property and Adjoining Properties

URS requested EDR to search four different types of historical records for the subject property and surrounding properties:

- Historical Aerial Photographs
- Historical Topographic Maps
- Sanborn Fire Insurance Maps
- City Directories

The results of these record searches for the subject property and the surrounding area are summarized below.

Historical Aerial Photographs

URS examined historic aerial photographs of the 1926 Tuolumne Street obtained from EDR for the years 1946, 1957, 1962, 1972, 1984, 1987, 1998, 2005, 2006, 2009, 2010, and 2012. A description of these aerial photographs is presented in Table 1. No RECs were identified through this review. A copy of the Historical Aerial Photographs is provided in Appendix D.

Table 1 – Summary of Aerial Photograph Review for APNs 467-04-20ST, -22ST, -23ST, Fresno, CA		
Year of Photo	Finding	
1946, 1957, 1962	The subject property parcels -22ST and -23ST are developed as part of downtown Fresno. Warehouse structures facing H Street appear to cover the extent of the parcels on the northeast. Rail spur lines appear on the southwest side of the parcels adjacent to the warehouses. Five rail spur lines appear on parcel -20ST and the Southern Pacific main rail line appears further southwest. The vicinity is improved with commercial and light industrial urban development and paved city streets.	
1972	Warehouse structures on parcels -22ST and -23ST facing H Street still appear on the extent of the parcels. The subject property has fewer rail spurs; however the Southern Pacific main rail line still appears southwest. Parcel -20ST appears vacant. City street configurations northeast of the site have changed. The vicinity is still densely developed with commercial and light industrial urban improvements.	
1984, 1987	The subject property and vicinity appear as in the previous photograph.	
1998	The subject property parcels -20ST and -22ST are vacant. A warehouse remains on parcel -23ST. Commercial and light industrial development has thinned out to the west and south and several vacant lots appear. The Southern Pacific main rail line still appears southwest. The vicinity east of the subject property, across H Street, remains as in previous photographs.	
2005 to 2012	The subject property parcels -20ST and -22ST are developed as paved parking lots. A warehouse remains on parcel -23ST. City street configuration east of the subject property has changed dramatically as the present-day Chukchansi Park Stadium appears northeast of the subject property. The Southern Pacific (now Union Pacific) main rail line still appears southwest. Several vacant lots and sporadic commercial development appear west and south of the subject property.	

Historical Topographic Maps

URS reviewed historic topographic maps provided by EDR for the subject property and surrounding areas and dated 1942, 1946, 1963, 1972, and 1981. A description of these maps is presented in Table 2. No RECs were identified through this review. A copy of the Historical Topographic Maps is provided in Appendix E.

Table 2 – Summary of Topographic Map Photograph Review		
Year of Map	Finding	
1942, 1946, 1963	The subject property and surrounding areas are shown as part of a downtown area; due to the scale of the map, site specific details are difficult to discern. Structures appear on the northeast side of the subject property. Rail spurs appear on the southwest side of the subject property. The Southern Pacific main line appears adjacent south west of the subject property.	
1972 1981	The subject property and surrounding areas are shown as part of a downtown area; due to the scale of the map, site specific details are difficult to discern. The Fresno County Courthouse is clearly landmarked near the subject property. City streets have changed configurations east of the subject property.	

Sanborn Fire Insurance Maps

URS also contacted EDR to obtain Sanborn fire insurance maps for the subject property and surrounding area and dated 1885, 1888, 1898, 1906, 1918, 1948, 1950, and 1970. A description of these maps is presented in Table 3. No RECs were identified through this review. A copy of the Sanborn Fire Insurance Map search results is provided in Appendix F.

Table 3 – Summary of Sanborn Map Photograph Review for 1926 Tuolumne Street		
Year of Map	Finding	
1885	The subject property has not been developed, however rail spurs appear on the northwest end of the site. There is residential development, a blacksmith shop, and a beer hall northeast of H Street. Inyo Street and Kern Street are defined.	
1888	The subject property parcels -22ST and -23ST appear vacant. Prescott & Pierce Lumber Warehouse is located on the northwest end of parcel -20ST and Prescott & Pierce Grain Warehouse is located on the southeast end. Southern Pacific Rail Road Reservation and lumber piles appear southwest of the subject property parcels.	
1898	The subject property parcels -22ST and -23ST appear as Rail Road Reservation property. Parcel -20ST appears as in 1888 with additional rail spurs southwest of the structures. Valley Lumber Company is located south east of the subject property, southeast of Mono Street. Hobbs Parsons Wholesale Produce is located northwest of the subject property parcels. Commercial and light industrial development appears northeast of H Street.	
1906	The subject property parcel -22ST appears as California Pine Box Lumber Company. Parcel -23ST appears as Madary's Lumber Yard. Parcel -20ST appears as a Southern Pacific Rail Road (SPRR) Freight Warehouse. Vicinity sites appear as on the previous map with commercial and light industrial development appears northeast of H Street.	
1918	Parcel -20ST appears with multiple rail spurs. Parcel -22ST consists of California Pine Box and Lumber Company, Box Shook Warehouse, and Paper Warehouse. Parcel -23ST consists of Home Whole Grocery Company's Grocery Warehouse, Keg Storage, Wholesale Produce, Plumbing Supplies Storage; and a Valley Lumber Company Office. A rail spur appears adjacent to the warehouse structures the extent of the site. Hobbs Parsons Wholesale Produce is located northwest of the subject property parcels. Commercial and light industrial development appears northeast of H Street including Valley Foundry and Machine Works.	
1948	Parcel -20ST appears with multiple rail spurs and a lumber shed. Parcel -22ST consists entirely of Zellerbach Paper Company Shipping and Paper Warehouse. Parcel -23ST consists of Wholesale Produce and Valley Lumber Company Hardwood Building Materials and Office. A rail spur appears adjacent to the warehouse structures. Hobbs Parsons Wholesale Produce is located northwest of the subject property parcels. Commercial and light industrial development appears northeast of H Street.	
1950	No significant changes from the 1948 map appear to the subject property parcels or the surrounding area except several commercial buildings have been replaced with a parking garage northeast of the subject property.	
1970	Parcel -20ST appears with multiple rail spurs and a lumber shed. Parcel -22ST consists of Artificial Tree Manufacturing and Production Warehouse. Parcel -23ST consists of Formica Sink Top Warehouse, a Floor Tile Warehouse and wholesale florist supplies. Hobbs Parsons Wholesale Produce is located northwest of the subject property parcels. A rail spur appears adjacent to the warehouse structures. City streets northeast of the subject property have been reconfigured and a storm water retention basin has been installed northeast of the site, across H Street. Commercial and light industrial development appears east of H Street.	

<u>City Directories</u>

URS requested a City Directory Abstract from EDR for related subject property addresses. A copy of the City Directory Abstract is provided in Appendix G. The following address listings and dates were associated with the subject property:

<u>H Street</u>

701 H Street

1932 – United Warehouse Co.; Valley Lumber Co.; Alta Dist. Lumber Co.; Fowler Lumber Co.; 1937 – John Manville Inc. Roofing

707 H Street

1958 – United Wholesale Co; Sequoia Lumber Co.; Premier Investers, Inc.; Fowler Lumber Company; Valco Lumber Dist.

733 H Street

1927 – Valley Lumber Company

735 H Street

1927, 1932 – John Manville, Inc. Roofing
1958 – Zellerbach Paper Co.
1965, 1970 – Butler Johnson Corp.; Fresno Wholesale Floor Covering
1975 to 1990 – Slater Furniture Co.

737 H Street

1932 – Eagle Transfer Co.; Germain Seed & Plant Co.; California Spray Chemicals 1937 – Germain Seed & Plant Co. 1942 – Vacant

1958 – Fresno Macaroni Mfg. Co.

739 H Street

1937, 1942 – California Spray Chemical Co. 1952 – Vacant 1965 - Zellerbach Paper Co.; 1970 to 1990 - Vacant

741 H Street

1927, 1932, 1937, 1942 – Armour & Co. wholesale meats 1947 – United Fairway Produce Co. 1952, 1958 – Brentwood Egg Co.

755 H Street

1927, 1932 – Los Angeles Soap 1937 – Chemical Corporation; American Cyanamid 1942 – Vacant

775 H Street

1937, 1942 - Elbee Co. vending machines

801 H Street

1927 – Air Reduction sales; Coast Dakota Flour Co.; Hills Bros. coffee; Monarch Flour Co.; Paramount Seed Co.; Terminal Wholesale Co.

1932 – Air Reduction sales; Baker Hamilton & Pacilc steel; Coast Dakota Flour Co.; Gordon Allen Co. soap; Hills Bros. coffee; Monarch Flour Co.; Phillips Milling Co.; Sussman Wormser Co. wholesale flour and grocery warehouse

1937 – Air Reduction sales; Bomberger Seed Co.; Coast Dakota Flour Co.; Terminal Wholesale Co.; Leo J. Weyberg Co.; Weyl Zuckermaj wholesale radio supplies.

831 H Street

1927 – Germain Seed and Plant Co.; Chemical Corporation 1937 – Vacant

Mono Street

1745 Mono Street

1962, 1965, 1970 – Avenell Arioto Wholesale Florists 1980 to 1990 – Vacant

<u>Kern Street</u>

1976 Kern Street

1937 to 1962 – Zellerbach Paper Co. 1970 – Masterpiece of California Inc. Christmas Tree Mfg. 1975, 1980 – Peoples Furnature Warehouse 1986, 1990 - Vacant

No new concerns beyond those discussed above were identified in this City Directory search. A copy of the City Directory Abstract is provided in Appendix G.

4.3 Physical Setting Sources

Geology

The subject property is located in California's San Joaquin Valley. The San Joaquin Valley is approximately 400 miles long and averages 50 miles wide encompassing approximately 20,000 square miles. According to groundwater monitoring reports available through the State of California's GeoTracker system, the valley is a large asymmetric trough that is bounded by granitic, metamorphic, and marine sedimentary rocks of pre-tertiary age. The San Joaquin Valley is bounded by the granitic Sierra Nevada batholith to the east and the metamorphic Franciscan assemblage on the west. This trough has been filled with as much as 30,000 feet of sediment in the San Joaquin Valley portion to the south, and as much as 60,000 feet of sediment in the Sacramento Valley portion to the north. The age of the sediments range from Jurassic to Holocene and include both marine and lacustrine deposits (Matthews, 1965).

The subject Site lies within the low alluvial plains and fans of the San Joaquin Valley, between the Coastal Range and the Sierra Nevada Mountains. The alluvial plains and fans extend across the San Joaquin Valley from the Sierra Nevada Mountain front to the east side of the Coastal Range where they blend with the alluvium derived from the Coastal Range marine sediments.

<u>Soils</u>

The soils in the Fresno area primarily belong to the Great Valley Sequence. These soils are a variety of marine and lacustrine deposits ranging in age from Late Jurassic to Cretaceous. The oldest soils are Pleistocene lacustrine deposits with low permeability. The youngest soils include Quaternary stream channel deposits and alluvial deposits formed from the erosion of the granitic batholith to the east (Matthews, 1965). These deposits lie on undulating low terraces with slopes of 0 to 9 percent (Straham, 1914). The upper four feet is composed of a red loam duripan. These soils have a significantly low permeability. Most water-bearing materials are Late Tertiary and Quaternary in age.

According to the US Department of Agriculture Soil Conservation Service National Cooperative Soil Survey, the dominant soil composition in the general area of the subject property is Delhi loamy sand, characterized by high infiltration rates with deep, well and excessively well-drained sand and gravel textures; and San Joaquin sandy clay loam characterized by very slow infiltration rates and moderately well-drained clayey to impervious textures.

Topography

The Site is located in Sections 9 and 10 in Township 14 South, Range 20 East, Mount Diablo Base and Meridian. Topographic map coverage of the site is provided by the US Geological Survey, Fresno South, California, 7.5 minute quadrangle, 1:24000 series, dated 1963, photo-revised 1981. The elevation of the site is approximately 290 feet above sea level with an increase in topographic

relief to the south. The closest body of water is the San Joaquin River, located approximately 7 miles due north of the subject property.

Hydrogeology/Hydrology

The study area is in an area commonly referred to as the San Joaquin groundwater basin and the Kings groundwater sub-basin. This area is bounded on the north by the San Joaquin River, on the south by the Kings River, on the west by the Fresno Slough, and on the east by the Friant-Kern Canal and consolidated rocks of the Sierra Nevada (Burton et al., 2011).

No site-specific groundwater data was available for the subject property; however information obtained from GeoTracker indicates that depth to groundwater for wells in the general vicinity of the subject property was approximately 120 feet below ground surface in May 2014 and groundwater flow direction has historically been to the north/northeast. In the subject area as well as in the greater San Joaquin Valley in general, snow melt run off from the Sierra Nevada and percolating irrigation water have been the primary sources of groundwater recharge since the early 1900s. Approximately 85% of groundwater is used for the irrigation of farmland (Burton et al., 2011).

No standing water or indicator species of flora and fauna typically associated with wetlands were identified on the subject property during the site reconnaissance. The EDR report identified a small area of wetlands located a few hundred feet northeast of the subject site. According to EDR, in 2003 and 2011 the Federal Emergency Management Agency (FEMA) reported that the subject property is located within a 500-year flood zone.

5.0 SITE RECONNAISSANCE

Mr. Frank Gegunde of URS conducted a site reconnaissance of the exterior of the subject property on March 25, 2014 and the interior of the warehouse on parcel APN -23ST on May 9, 2014.

5.1 Methodology and Limiting Conditions

URS' methodology is provided in Section 1.2. The purpose of the site reconnaissance was to make visual observations that enable the development of conclusions relating to the likelihood of RECs in connections with the subject property. All accessible and unobstructed exterior areas of the subject property and all interior areas or representative interior areas were observed as part of this Phase I ESA. Additionally, URS staff conducting the exterior site reconnaissance traversed the periphery of the property and other areas with storage of materials or equipment.

No limitations such as physical obstructions or access restrictions were encountered during the site visit.

5.2 General Site Setting

Acquired by the RDA in the 1960s, two of the subject property parcels, -20ST and -22ST, are a commercial parking lot. Parcel -23ST is a historic warehouse currently being used by several tenants to store non-hazardous materials. Surrounding properties include retail and commercial buildings and services in a generally urban, downtown setting. Aside from vehicles in parking stalls and activities routinely associated with a commercial parking facility, the parking lot was generally empty at the time of URS' site reconnaissance. The lot is used primarily for patrons attending events at the Chukchansi Park Stadium northeast of the subject property.

There are Union Pacific Rail Road tracks west of the subject property and the vicinity was historically occupied by warehouses, cold storage facilities, and lumber yards that utilized the rail services. Many of these sites are now vacant. No activities being conducted onsite or on adjacent properties appeared to create environmental concerns associated with the subject property.

Photographs taken during the site reconnaissance are included in Appendix A.

5.3 Solid Waste

No solid waste other than paper material and cardboard boxes appeared to be generated, collected or stored on the subject property.

5.4 Hazardous Materials Handling and Storage

No hazardous materials were observed during the site reconnaissance.

5.5 Aboveground Storage Tanks

No ASTs were observed on site during the site reconnaissance.

5.6 Underground Storage Tanks

At the time of URS' site visit, evidence of USTs (e.g., fill ports, piping, or vent pipes) was not observed on the subject property.

According to GeoTracker, there is one LUST property located approximately 500 feet east and cross-gradient from the subject property. Remediation has been finalized at this cleanup site.

5.7 Potential PCB-Containing Exterior Electrical Transformers

At the time of the site visit, no suspect PCB-containing items, such as transformers, were observed on the subject property.

5.8 Other Potential PCB-Containing Interior or Exterior Equipment

At the time of the site visit, no other suspect PCB-containing items were observed on the subject property parcels APN -20ST or -22ST. URS observed multiple florescent lights in the warehouse located on parcel APN -23ST. PCB-containing florescent light ballasts (FLBs) that are currently in use have exceeded their designed life span. Sudden rupture of PCB-containing FLBs may pose health hazards to the occupants and is difficult and costly to clean up. The USEPA recommends removing PCB-containing FLBs from buildings as soon as possible to prevent potential inhalation or dermal exposure. Even intact PCB-containing FLBs may emit small amounts of PCBs into the air during normal use.

5.9 Suspect Asbestos-Containing Materials

There are no structures located on parcels APN -20ST or -22ST, therefore an asbestos survey was not conducted as part of this Phase I ESA. There was no evidence of asbestos containing materials (ACMs) on these parcels during the site visit. URS requested an asbestos survey from a private subcontractor, T. Brooks and Associates of Clovis, California, for the warehouse located on parcel APN -23ST (aka 735, 739, 741 H Street).

The methodology and results of the survey are presented under separate cover and entitled Asbestos Survey & Lead-Based Paint Inspection Report, Commercial Structure 735, 739, &741 "H" Street, Fresno, California, dated May 28, 2014.

The survey concluded, in part, that 20 samples collected by Brooks for analysis included one or more layers which tested positive for asbestos in amounts greater than 1.0 percent. The samples testing positive included drywall taping mud and texture, drywall texture, wall paneling, 9-inch x 9-inch vinyl floor tile and associated mastic, and vibration damper.

5.10 Lead-Based Paint

There are no structures located on parcels APN -20ST or -22ST, therefore a lead-based paint survey was not conducted as part of this Phase I ESA. There was no evidence of lead-based paint (LBP) on these parcels during the site visit. URS requested a LBP survey from a private subcontractor for the warehouse located on parcel APN -23ST (aka 735, 739, 741 H Street).

The methodology and results of the survey are presented under separate cover as described in Section 5.9 above.

The survey concluded, in part, that the majority of testing combinations considered as part of Brook's investigation were found to contain lead in some amount. A total of 47 testing combinations on the interior surfaces and 4 exterior surfaces were found to include lead in excess of 1.0 milligrams per square centimeter $(mg/cm^2)(0.5\%)$, (5,000 parts per million) and would be classified as "Lead-Based Paint" (LBP) under state and federal regulations.

5.11 Air Quality and Odors

No strong, pungent, or noxious odors were noted during the site reconnaissance.

5.12 Stains

URS did not observe evidence of stained soil or stressed vegetation on the subject property during the site visit. The asphalt parking lot contained small amounts of normal oil staining associated with vehicles, considered to be a *de minimis* condition if reported to any regulatory agency.

5.13 Radon

The subject site is located in Zone 2 on the California EPA Map of Radon Zones developed by the U.S. EPA and the U.S. Geological Survey. Buildings in Zone 2 have a predicted average indoor radon screening level between 2 and 4 picoCuries per liter (pCi/L). Frequent exposure to radon levels above 4 pCi/L is considered a potential health risk. The parking lot is not likely to become a reservoir for radon gas on the site given that there are no below grade structures or enclosed areas.

5.14 Railroad Rights-of-Way

The Union Pacific Rail Road (formerly the Southern Pacific Rail Road) main track, one rail siding, and one spur line are located west of the subject property parcel -20ST. There were formerly numerous rail spurs that historically serviced the subject property warehouses and lumber yards; however those have all been removed and no evidence of railroad activities remains on the parcels. According to the Fresno County Assessor's parcel map, there are no rail road rights of way associated with the subject property.

5.15 Surface Water

As the subject property is a paved parking lot, no bodies of water are present or are anticipated to be present. Storm water runoff is to the south, but does not impact the facility. The closest body of water is the San Joaquin River, located approximately 7 miles due north of the subject property.

URS did not observe evidence of pits, ponds, basins, or lagoons on the subject property during the site visit.

5.16 Potable Water Supply and Wells

Municipal water from the City of Fresno is provided to the subject property and properties in the area. No other source of potable water was observed on the subject property at the time of the site visit.

5.17 Wastewater and Sewer System

No wastewater is generated on the subject property due to lack of active onsite processes. Municipal sanitary sewer service is provided to the properties in the area and it is reasonable to assume that any sewer wastewater generated in the warehouse structure on parcel APN -23ST is discharged to the municipal sanitary sewer system.

5.18 Mold or Mold-like Substances

No buildings were present on parcels APN -20ST or -22ST at the time of URS' visit. URS did not observe any visual mold or mold-like substances at the time of the site visit. Water damage and mold-like substances were observed in several locations in the warehouse structure on parcel APN - 23ST. These observations were not formally addressed in the ACM and LBP surveys discussed in Sections 5.9 and 5.10 above and are discussed here only for reference.

6.0 INTERVIEWS

Mr. Frank Gegunde of URS conducted interviews with appropriate representatives of the subject property using the User Questionnaire per AAI standards as a guide. Information obtained through these interviews is presented below.

6.1 Interview with Owner Representative

Person interviewed: Mr. Enrique Mendez

Relationship to Subject Property: Project Coordinator, Successor Agency to the Redevelopment Agency of the City of Fresno who owns the subject property.

URS submitted a User Questionnaire per AAI standards to Mr. Enrique Mendez, representing the Owner, regarding specialized user knowledge of the subject property. Mr. Mendez stated that, to the best of his knowledge, there are no known environmental concerns associated with the subject property, and that there are no environmental liens or activity or use limitations associated with the subject property.

6.2 Interview with *Key Site Manager*

Person interviewed: Mike Bashian - Ace Parking Management Relationship to Subject Property: *Key Site Manager*

Ace Parking Management, Inc. operates the parking facility that occupies the subject property, City of Fresno Stadium Parking. Ace Parking manages more than 450 locations throughout the southern and western United States. The regional office is located at 2125 Kern Street, suite #101, Fresno, CA 93721 (559-264-6422). According to Mr. Bashian, no activities are conducted on the subject property that represents a potential recognized environmental concern for the parking facilities on parcels -20ST, -22ST, or the warehouse on parcel -23ST.

6.3 Interviews with Occupants

Person interviewed: Mr. Augie Quiroz – Workforce Connections Relationship to Subject Property: *Tenant* in the suite at the address 739 H Street, parcel -23ST.

Mr. Quiroz stated that, to the best of his knowledge, there are no known environmental concerns associated with the subject property, and that there are no environmental liens or activity or use limitations associated with the subject property suite at 739 H Street (parcel -23ST).

Person interviewed: Mr. Jeremy Ruiz – Associate Coordinator/Facilities Management – Fresno County Economic Opportunities Commission

Relationship to Subject Property: Tenant in the suite at the address 735 H Street, parcel -23ST.

Mr. Ruiz stated that, to the best of his knowledge, there are no known environmental concerns associated with the subject property, and that there are no environmental liens or activity or use limitations associated with the subject property suite at 735 H Street (parcel -23ST).

6.4 Interview with Local Government Officials

No interviews with government officials were conducted as part of this Phase I ESA.

6.5 Interviews with Others

No other interviews were conducted as part of this Phase I ESA.

7.0 FINDINGS

URS has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of three (3) parcels comprising approximately 5.5 acres of land located in Fresno, Fresno County, California. The combined parcels consist of a parking lot located at 801 H Street between Mono Street to the south and Kern Street to the north, and a warehouse with multiple addresses facing H Street to the east. The APNs are 467-04-20ST, 4.32 acre parking lot; 467-04-22ST, 0.65-acre parking lot; and 467-04-23ST, 0.54 acres with a warehouse having three addresses: 735, 739, and 741 H Street. The parcels are referenced in this ESA as -20ST, -22ST, and -23ST respectively. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. The findings are presented below.

Based on a review of historical documents, parcel APN -20ST has been developed as a parking lot for commercial use since the late 1990s. Between the late 1980s and the late 1990s the parcel was vacant. Prior to the 1980s the parcel consisted of several railroad spur lines used to service lumber, paper, and produce warehouses located on parcels APN -22ST and -23ST. Parcel -22ST consisted of warehouses and commercial development until the early 1980s. The parcel was vacant in the 1980s and developed into a parking lot in the late 1990s. The warehouse currently occupying parcel APN -23ST is visible in aerial photographs back to at least 1946 and other historical documents back to at least 1885.

7.1 Data Gaps

ASTM E 1527-05 or AAI data gaps are summarized as follows:

- No previous owner/user was interviewed because no representative was identified;
- No standard historical source was readily available discussing site use prior to 1885, when the subject property appears to have been undeveloped land.

7.2 Items of Concern

This assessment identified no items of concern in connection with the subject property, except for the following:

There are 22 historical dry cleaning sites located from 0.011 to 0.234 miles up-gradient of the subject property. Given the number and location of these Historical Cleaners, it is possible that groundwater beneath the subject property has potentially been impacted by past unauthorized discharges from these facilities.

Based on the date of construction, URS requested an asbestos and lead-based paint survey from a private subcontractor, T. Brooks and Associates of Clovis, California, for the warehouse located on parcel APN 467-04-23ST (aka 735, 739, 741 H Street). The methodology and results of the survey are presented under separate cover and entitled Asbestos Survey & Lead-Based Paint Inspection Report, Commercial Structure 735, 739, &741 "H" Street, Fresno, California, dated May 28, 2014.

The survey concluded, in part, that 20 samples collected by Brooks for analysis included one or more layers which tested positive for asbestos in amounts greater than 1.0 percent. The samples testing positive included drywall taping mud and texture, drywall texture, wall paneling, 9-inch x 9-inch vinyl floor tile and associated mastic, and vibration damper.

The survey concluded, in part, that the majority of testing combinations considered as part of Brook's investigation were found to contain lead in some amount. A total of 47 testing combinations on the interior surfaces and 4 exterior surfaces were found to include lead in excess of

1.0 milligrams per square centimeter $(mg/cm^2)(0.5\%)$, (5,000 parts per million) and would be classified as "Lead-Based Paint" (LBP) under state and federal regulations.

7.3 Recognized Environmental Conditions

This assessment identified no RECs in connection with the subject property.

7.4 Historical RECs

This assessment identified no historical RECs in connection with the subject property.

7.5 De Minimis Conditions

Minor oil stains were observed in the parking area on asphalt and concrete surfaces.

8.0 **OPINION**

8.1 Data Gaps

The data gaps discovered during this Phase I ESA are discussed above in Section 7.1. No previous owner/user was interviewed and no standard historical source was readily available discussing site use prior to 1885, when the subject property appears to have been vacant land. Based on historical site use of the subject property, it is URS' opinion that these data gaps are not significant enough to warrant further investigation.

8.2 Items of Concern

For the following reasons it is URS' opinion that there is a low likelihood that significant environmental liability exists regulated to the historical activities of 22 historical dry cleaning sites located from 0.011 to 0.234 miles up-gradient of the subject property:

- No water supply wells exist on the subject property parcels.
- Potable water is supplied to the subject property parcels via the City of Fresno municipal water supply and is tested periodically for contamination.
- Two of the three subject property parcels have been redeveloped as a fully-paved parking facility for over 40 years. The third parcel is a historic warehouse that dates back to at least the early 1900s.
- No evidence of soil or groundwater contamination issues was identified during interviews with site contacts or during agency database reviews.
- It is URS' opinion that ACMs and LBPs are items of concern for the subject property. Suspect asbestos-containing materials (ACMs) should be formally assessed by a certified asbestos consultant prior to any renovation or demolition which may disturb such materials. Confirmed ACMs should be handled by a licensed asbestos contractor and appropriately disposed of. Painted surfaces which are in good condition do not require any action. However, if the painted surfaces are abated, certain waste disposal practices are required. Suspect paint should be formally assessed by a certified lead materials inspector prior to any renovation or demolition that may disturb such materials. Activities that may disturb confirmed LBP should be handled under the supervision of a certified lead materials inspector.

8.3 Recognized Environmental Conditions

This assessment identified no RECs in connection with the subject property.

8.4 Historical RECs

This assessment identified no historical RECs in connection with the subject property.

8.5 De Minimis Conditions

Pavement oil stains represent a *de minimis* condition that does not present a threat to human health or the environment and generally would not be subject to an enforcement action if brought to the attention of regulatory agencies.

9.0 CONCLUSIONS

URS has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of three (3) parcels comprising approximately 5.5 acres of land located in Fresno, Fresno County, California. The combined parcels consist of a parking lot located at 801 H Street between Mono Street to the south and Kern Street to the north, and a warehouse with multiple addresses facing H Street to the east. The APNs are 467-04-20ST, 4.32 acre parking lot; 467-04-22ST, 0.65-acre parking lot; and 467-04-23ST, 0.54 acres with a warehouse having three addresses: 735, 739, and 741 H Street. The parcels are referenced in this ESA as -20ST, -22ST, and -23ST respectively. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of recognized environmental conditions or historical recognized environmental conditions in connection with the subject property and no further investigations appear warranted.

This assessment has revealed evidence of three potential items of concern in connection with the subject property. These observations are described in Section 7.0.

This Phase I ESA was accomplished by, and limited to, a reconnaissance of the site, a drive-by survey of the site vicinity, and review of agency databases and other records regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the site.

The services provided by URS were performed under a written contract with the Agency, and authorized by the Agency's Notice to Proceed dated February 27, 2013. Authorization to proceed with this Phase I ESA was received by email on April 17, 2013 from Mr. Enrique Mendez, representing the Agency.

Phase I ESA - APNs 467-04-20ST, -22ST, -23ST, Fresno, CA

10.0 DEVIATIONS

No deviations from the scope of services occurred during the performance of this Phase I ESA.

11.0 ADDITIONAL SERVICES

No additional services were included in URS' contract with Agency.

13.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The conclusions presented in this report are professional opinions based solely upon URS' visual observations of the Site and the immediate Site vicinity, and upon URS' interpretations of the readily available historical information, conversations with personnel identified by the client to be knowledgeable about the Site, and other readily available information, as identified in this report. The conclusions are intended exclusively for the purpose stated herein, at the Site indicated, and for the project indicated.

This report is intended for the sole use of the Agency. The scope of services performed during this investigation may not be appropriate for other users, and any use or re-use of this document or of the findings, conclusions, or recommendations presented herein is at the sole risk of said user.

This study was not intended to be an exhaustive investigation of any potential contamination that could exist at the subject property. Given that the scope of services for this investigation was limited, and given that no exploratory soils borings, soil, or groundwater sampling, or laboratory analyses were performed, currently unrecognized contamination may exist on the Site, and level of this potential contamination may vary across the Site.

A limited visual inspection of suspect asbestos-containing material was conducted. This inspection was not intended to substitute for an Asbestos Hazard Emergency Response Act-type survey, nor was it intended to determine the extent or limits of asbestos-containing materials that may be present. A limited visual inspection for damaged paint that has the potential to be lead-based paint was also performed; however, this visual inspection does not identify whether lead-based paint is present on the subject property.

This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment.

Opinions and recommendations presented in this report apply to site conditions and features as they existed at the time of URS' site visit and those reasonably foreseeable. They cannot necessarily apply to conditions and features of which URS is unaware and has not had an opportunity to evaluate.

The environmental professionals listed below indicate the following by signing this document:

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312."

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

This report was prepared by: This report was prepared by: FRANK GEGUNDE No. 7998 Exp. 6/30/15 Frank L. Gegunde, PG

Senior Geologist/Deputy Project Manager

13.1 Statement of Quality Assurance

This project was conducted in accordance with URS' Quality Assurance/Quality Control (QA/QC) manual. The main QA/QC procedures (with a summary of their applicability to this project) are provided below:

- Central Files both hard copy and electronic central files are established and file plans created to ensure all documents are maintained in an orderly fashion.
- Program Management Plan (PMP) and Task Order Instructions A PMP that provides information related to the overall contract is prepared and provided to the program team. Once tasks are awarded under the contract, Task Order Instructions that provide deadlines, budgets, and scope of work are prepared by the Task Manager and then distributed to the team.
- Independent Technical Review (ITR) Each report is reviewed by an experienced, qualified staff member to ensure the contract requirements are met, the standards are followed, and the conclusions are sound.
- Periodic internal audits are performed to ensure all the QA/QC requirements are met for this contract.

14.0 QUALIFICATION(S) OF ENVIRONMENTAL PROFESSIONAL(S)

Utilizing the combined resources of more than 55,000 employees in a network of offices in more than 300 cities worldwide, URS serves a variety of public sector clients at the local, municipal, state, and federal level. We work closely with private sector clients in the oil, petrochemical, natural gas, chemical, forest products, mining, power, communications, and general manufacturing industries.

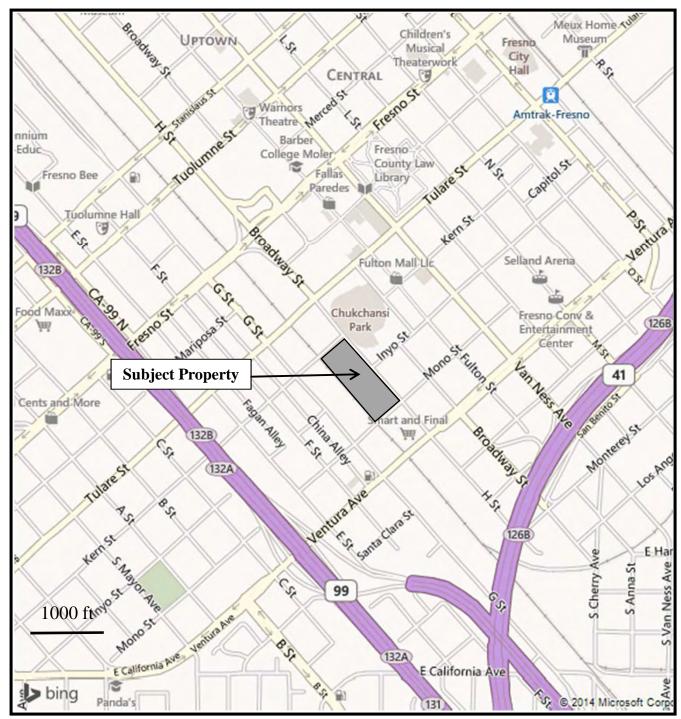

URS offers a variety of environmental site assessment services designed to provide our clients with the information they require to assess the risks associated with hazardous materials, including polychlorinated biphenyls (PCBs) and asbestos; regulatory requirements; soil and foundation conditions; seismic vulnerability; wetlands; and sensitive biological resources.

URS Corporation has more than 100 offices located in the United States including Alaska and Hawaii. URS has over 2,000 personnel in California including: air quality specialists, archeologists, architects, biologists (aquatic and wildlife), construction managers/inspectors, drafters, engineers (including chemical, civil, environmental, electrical, geotechnical, industrial, mechanical, sanitary, structural, and wastewater), estimators, geologists, hydrogeologists, hydrologists, industrial hygienists, interior designers, landscape architects, permitting specialists, planners, regulatory specialists, soil scientists, surveyors, and technical writers. This combination of staff and offices make it possible for URS to provide multidiscipline services in a cost-effective manner with personnel who are experienced in local conditions and are readily available.

URS staff members have successfully completed thousands of environmental site assessments in the United States including Alaska and Hawaii. We have worked for a wide variety of clients and have participated with their legal counsel in evaluating potential environmental liability and associated costs.

The resumes of the Environmental Professional(s) involved in this Phase I ESA are included in Appendix H.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business. Please contact EDR at 1-800-352-0050 with any questions or comments.

PROPERTY INFORMATION

Deed 1:

According to the Fresno County Assessor, the current owner of the subject property is the City of Fresno. Records were searched at the Fresno County Recorder's Office back to 1980. No conveyance was found of record for the subject property.

Legal Description: All that certain piece or parcel of land containing 4.320 acres, more or less, being a portion of Sections 9 and 10 in Township 14 South, Range 20 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described and being a portion of the land shown as Railroad Reservation on the Official Map of the Town of Fresno, recorded in Book 1, Pages 1 and 2 of Plats situate and lying in the County of Fresno, State of California.

Legal Current Owner: City of Fresno

Property Identifiers: 467-040-20ST

Deed 2:

According to the Fresno County Assessor, the current owner of the subject property is the City of Fresno. Records were searched at the Fresno County Recorder's Office back to 1980. No conveyance was found of record for the subject property.

Legal Description: All that certain piece or parcel of land containing 0.650 acres, more or less, being a portion of Sections 9 and 10 in Township 14 South, Range 20 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described and being a portion of the land shown as Railroad Reservation on the Official Map of the Town of Fresno, recorded in Book 1, Pages 1 and 2 of Plats situate and lying in the County of Fresno, State of California.

Legal Current Owner: City of Fresno

Property Identifiers: 467-040-22ST

Deed 3:

According to the Fresno County Assessor, the current owner of the subject property is the City of Fresno. Records were searched at the Fresno County Recorder's Office back to 1980. No conveyance was found of record for the subject property.

Legal Description: All that certain piece or parcel of land containing 0.540 acres, more or less, being a portion of Sections 9 and 10 in Township 14 South, Range 20 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described and being a portion of the land shown as Railroad Reservation on the Official Map of the Town of Fresno, recorded in Book 1, Pages 1 and 2 of Plats situate and lying in the County of Fresno, State of California.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive

Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 3 CERCLIS sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PG&E GAS PLANT FRESNO 325 3	NW COR N THORNE AVE&	BUWNW 1/8 - 1/4 (0.234 mi.)	AB269	199

PG&E GAS PLANT FRESNO 325 3A	F/MARIPOSA BET F G FRE	S WNW 1/8 - 1/4 (0.234 mi.)	AB272	203

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/10/2013 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/03/2014 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 12/16/2013 has revealed that there are 47 LUST sites within approximately 0.5 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 62 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

PG AND E MANUFACTURED GAS PLAN	BLOCK OF F,G, FRESNO AN	WNW 1/8 - 1/4 (0.234 mi.)	AB273	205

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 117 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 52 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

	Environmental Interest/Information System RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Cons even and t progr	nformation System Alnfo is a national information system that supports the Resource ervation and Recovery Act (RCRA) program through the tracking of s and activities related to facilities that generate, transport, reat, store, or dispose of hazardous waste. RCRAInfo allows RCRA am staff to track the notification, permit, compliance, and ctive action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order
	should cause a relatively minor impairment of beneficial uses compared
	to a major or minor threat. Not: All nurds without a TTWQ will be
	considered a minor threat to water quality unless coded at a higher
	Level. A Zero (0) may be used to code those NURDS that are found to
	represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as
	cooling water dischargers or thosewho must comply through best
	management practices, facilities with passive waste treatment and
	disposal systems, such as septic systems with subsurface disposal, or
	dischargers having waste storage systems with land disposal such as
	dairy waste ponds.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History:	The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Case Worker:	KDJ
Local Agency:	FRESNO COUNTY
RB Case Number:	5T10000457
LOC Case Number:	FA0169029
File Location:	Not reported
Potential Media Affect:	Under Investigation
Potential Contaminants of Concern:	Diesel
Site History:	The case was opened following an unauthorized release from an
	underground storage tank system at the subject site. Corrective
	action is underway as directed by the CVRWQCB. Corrective action may
	consist of preliminary site investigation, planning and
	implementation of remedial action, verification monitoring, or a
	combination thereof. A summary of the site history is available by
	clicking on either the "Cleanup Status History", "Regulatory
	Activities" or the "Site Maps/Documents" tab. For a complete site
	history the case file at the CVRWQCB should be consulted.

Facility name:	WILSHIRE PAINT CO
Classification:	Large Quantity Generator

Hazardous Waste Summary: Waste code:

D001
IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF
LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS
CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE
FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,
WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE
MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT
WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: Waste name:	D002 A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Waste code: Waste name:	D005 BARIUM
Waste code:	D007

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

	Potential Media Affeo Potential Contamina		Aquifer used for drinking water supply		
	Site History:	its of Concern.	The Site is located at 1152 G Street in Fresno. The Site was		
	end motory.		historically used, from 1965 to 1986, to store bulk		
			tetracholoroethene (PCE) in an aboveground storage tank at the		
			northern section of the property. Soil and soil vapor surveys in 1996		
			indicated the presence of PCE. Several monitoring wells were installed in 1996 and showed PCE in the underlying groundwater. In 1998 a vapor extraction system was installed and ran until 2004. The extracted soil vapor is treated using two 2500-pound activated carbon vessels to remove the VOCs. Through subsequent testing a series of		
			groundwater monitoring wells have been installed and continue to b		
			monitored quarterly. Four new offsite SVE wells were installed durin	ng	
			late 2008. An SVE system is currenlty extracting soil vapors from		
			five vapor extraction wells located near the highest concentrations	,	
			of PCE in groundwater and soil. This is located just downgradient of	I	
			the site. Investigation to assess the lateral and vertical extent of impacts to groundwater is ongoing. A remediation action plan and		
			Report of Waste Discharge has been submitted for insitu biodegrati	on	
			of solvents in groundwater. Waste Discharge Requirements have b		
			approved. Univar is currently delineated lateral and vertical extent		
			of impacted groundwater on northeastern portion of plulme.

> RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History:	This is the second underground storage tank (UST) found and rem
	from the former Kalashian Packing Company site. This second US
	removed under permit from the County of Fresno Department of Pe
	Health on April 8, 2009. Sample Results from beneath the UST
	indicated that an unauthorized release of diesel, and oil and grease
	petroleum hydrocarbons occurred. Jurisdiction for cleanup oversight
	belongs with the Regional Water Quality Control Board, Central Va

Benzene, a constituent of petroleum products is currently on the list of Proposition 65 chemicals as a known carcinogen. The preliminary investigation conducted at the site showed soil contamination. Further investigation will be required. The case will be referred to the California Regional Water Quality Control Board, Central Valley Region for review, future site investigations and direct further assessment work as needed. The scope of future subsurface investigation may include the determination of potential groundwater impacts. Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 01/28/2014 Number of Days to Update: 78 Source: EPA Telephone: N/A Last EDR Contact: 01/21/2014 Next Scheduled EDR Contact: 04/21/2014 Data Release Frequency: Quarterly

NPL Site Boundaries

Sources:

EPA's Environmental Photographic Interpretation Center (EPIC) Telephone: 202-564-7333

EPA Region 1 Telephone 617-918-1143

EPA Region 3 Telephone 215-814-5418

EPA Region 4 Telephone 404-562-8033

EPA Region 5 Telephone 312-886-6686

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Source: EPA Telephone: N/A Last EDR Contact: 01/09/2014 Next Scheduled EDR Contact: 04/21/2014 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 01/28/2014 Number of Days to Update: 78 Source: EPA Telephone: N/A Last EDR Contact: 01/09/2014 Next Scheduled EDR Contact: 04/21/2014 Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 02/13/2014 Number of Days to Update: 94 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 02/28/2014 Next Scheduled EDR Contact: 06/09/2014 Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013 Date Data Arrived at EDR: 07/08/2013 Date Made Active in Reports: 12/06/2013 Number of Days to Update: 151 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 01/10/2014 Next Scheduled EDR Contact: 04/21/2014 Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 02/13/2014 Number of Days to Update: 94 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 02/28/2014 Next Scheduled EDR Contact: 06/09/2014 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Varies

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 03/10/2014
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/23/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/17/2013 Date Data Arrived at EDR: 01/14/2014 Date Made Active in Reports: 01/28/2014 Number of Days to Update: 14 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 03/10/2014 Next Scheduled EDR Contact: 06/23/2014 Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/20/2013 Date Data Arrived at EDR: 11/21/2013 Date Made Active in Reports: 02/24/2014 Number of Days to Update: 95 Source: Department of the Navy Telephone: 843-820-7326 Last EDR Contact: 02/14/2014 Next Scheduled EDR Contact: 06/02/2014 Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013 Date Data Arrived at EDR: 10/01/2013 Date Made Active in Reports: 12/06/2013 Number of Days to Update: 66 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 02/07/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Annually

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 02/03/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 02/06/2014	Telephone: 916-323-3400
Date Made Active in Reports: 03/17/2014	Last EDR Contact: 03/13/2014
Number of Days to Update: 39	Next Scheduled EDR Contact: 05/19/2014
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 02/03/2014 Date Data Arrived at EDR: 02/06/2014 Date Made Active in Reports: 03/17/2014 Number of Days to Update: 39 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 05/19/2014 Data Release Frequency: Quarterly

State and tribal landfill and/or solid waste disposal site lists

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 02/14/2014 Date Data Arrived at EDR: 02/18/2014 Date Made Active in Reports: 03/18/2014 Number of Days to Update: 28 Source: Department of Resources Recycling and Recovery Telephone: 916-341-6320 Last EDR Contact: 02/18/2014 Next Scheduled EDR Contact: 06/02/2014 Data Release Frequency: Quarterly

VCP: Voluntary Cleanup Program Properties

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 02/03/2014 Date Data Arrived at EDR: 02/06/2014 Date Made Active in Reports: 03/17/2014 Number of Days to Update: 39 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 05/19/2014 Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/24/2013 Date Data Arrived at EDR: 09/24/2013 Date Made Active in Reports: 12/06/2013 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 03/20/2014 Next Scheduled EDR Contact: 07/07/2014 Data Release Frequency: Semi-Annually

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/10/2013	Telephone: 202-307-1000
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 03/04/2014
Number of Days to Update: 65	Next Scheduled EDR Contact: 06/16/2014
	Data Release Frequency: Quarterly

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006 Number of Days to Update: 21 Source: Department of Toxic Substance Control Telephone: 916-323-3400 Last EDR Contact: 02/23/2009 Next Scheduled EDR Contact: 05/25/2009 Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 02/03/2014 Date Data Arrived at EDR: 02/06/2014 Date Made Active in Reports: 03/17/2014 Number of Days to Update: 39 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 03/13/2014 Next Scheduled EDR Contact: 05/19/2014 Data Release Frequency: Quarterly

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

	Data Release Frequency: Varies

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40 Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 11/18/2013 Date Data Arrived at EDR: 02/27/2014 Date Made Active in Reports: 03/12/2014 Number of Days to Update: 13 Source: EPA Telephone: (415) 947-8000 Last EDR Contact: 03/14/2014 Next Scheduled EDR Contact: 06/23/2014 Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/01/2013 Date Data Arrived at EDR: 12/12/2013 Date Made Active in Reports: 02/13/2014 Number of Days to Update: 63 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 01/27/2014 Next Scheduled EDR Contact: 05/12/2014 Data Release Frequency: Varies

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2011 Date Data Arrived at EDR: 02/26/2013 Date Made Active in Reports: 04/19/2013 Number of Days to Update: 52 Source: EPA/NTIS Telephone: 800-424-9346 Last EDR Contact: 02/28/2014 Next Scheduled EDR Contact: 06/09/2014 Data Release Frequency: Biennially

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: Rextag Strategies Corp. Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals: Source: American Hospital Association, Inc. Telephone: 312-280-5991 The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals. Medical Centers: Provider of Services Listing Source: Centers for Medicare & Medicaid Services Telephone: 410-786-3000 A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services. Nursing Homes Source: National Institutes of Health Telephone: 301-594-6248 Information on Medicare and Medicaid certified nursing homes in the United States. **Public Schools** Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states. **Private Schools** Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on private school locations in the United States. Daycare Centers: Licensed Facilities Source: Department of Social Services Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image

is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Target Property Map:	36119-F7 FRESNO SOUTH, CA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

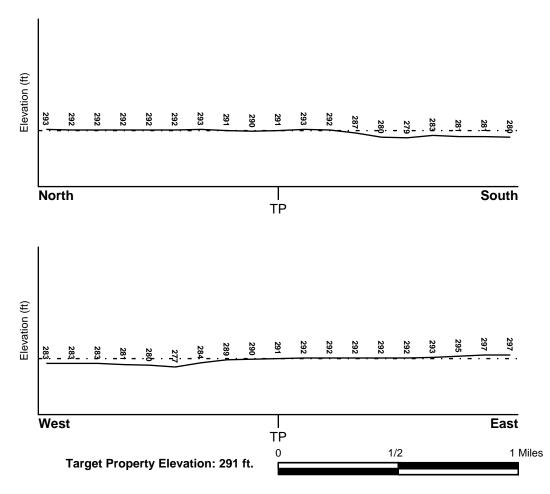

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Ν

Target Property County FRESNO, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06019C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported
NATIONAL WETLAND INVENTORY	NWI Electronic
NWI Quad at Target Property FRESNO SOUTH	<u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	•	1.25 miles
Status:		Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

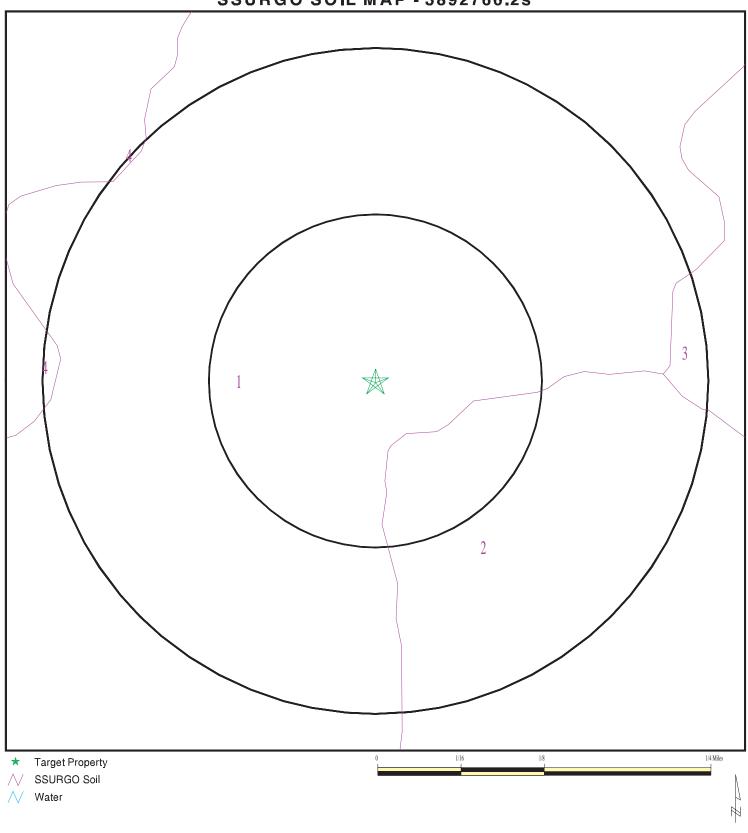

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	DELHI
Soil Surface Texture:	loamy sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessively drained
Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
	Βοι	undary		Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	7 inches	25 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.1
3	25 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.1

Soil Map ID: 2

Soil Component Name:	SAN JOAQUIN
Soil Surface Texture:	sandy clay loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Moderately well drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
Boundary			Classification		Saturated hydraulic		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	16 inches	27 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
2	27 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 7.3 Min: 6.1
3	29 inches	35 inches	cemented	Not reported	Not reported	Max: 0 Min: 0	Max: Min:
4	35 inches	59 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1
5	0 inches	16 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.5 Min: 5.6

Soil Map ID: 3

Soil Component Name:	MADERA
Soil Surface Texture:	loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Moderately well drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

Soil Layer Information

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation Telephone: 916-323-1779 Oil and Gas well locations in the state.

RADON

State Database: CA Radon Source: Department of Health Services Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business. Please contact EDR at 1-800-352-0050 with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by URS Corporation were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

APPENDIX H RESUMES OF ENVIRONMENTAL PROFESSIONALS

Areas of Expertise

- Environmental Site Assessments
- Environmental Due
 Diligence
- Environmental Geology
- Landfill Investigations
- Groundwater Resources
- Soil and Groundwater Remediation
- Project Management
- Project Health and Safety Coordination

Years of Experience

With URS: 8 Years With Other Firms: 6 Years

Education

BS/Geology/2000/California State University, Fresno

Registration/Certificati on

2005/Professional Geologist/ CA/#7998/Exp. 06/30/15

Frank L. Gegunde, PG

Senior Geologist

Overview

Mr. Gegunde is a licensed Professional Geologist. He has extensive experience in conducting all aspects of Phase I and Phase II environmental site assessments (ESAs) and is certified by the State of California as an environmental professional as defined in ASTM Standard E 1527-05, Appendix X2 pursuant to 40 CFR10 Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule.

Mr. Gegunde has a thorough knowledge of soil boring and sampling techniques including continuous coring, split-spoon sampling, cone penetrometer testing technology (CPT) and GeoprobeTM direct push apparatus. He is well versed in monitoring well and piezometer installation methods as well as groundwater sampling and well monitoring procedures. Mr. Gegunde also has conducted numerous active soil gas investigations as well as passive soil gas investigations using GoreSorberTM technology to isolate "hotspots" of contamination for further subsurface investigation.

Mr. Gegunde is an experienced Project Manager and brings organizational and supervisory skills to URS from 27 years in the dairy and transportation industries.

Project Specific Experience

Deputy Project Manager; USEPA Brownfields Assessment Grant to the Successor Agency to the Redevelopment Agency of the City of Fresno, California; 2013, Cost: \$278K. The purpose of the grant is to assess publically-owned properties via Phase I and Phase II ESAs that are potentially impacted by hazardous substances and/or petroleum and encourage the reuse of contaminated property for redevelopment in

specific sites within the city of Fresno, California. The data from the environmental site assessments provided through this EPA grant will be used to compile an inventory of sites and their brownfield status (level of contamination). This information will help determine the redevelopment potential of each site and identify any necessary remediation.

Field Task Manager and Team Task Leader, California High Speed Rail Authority, Fresno, CA, Joint Venture IWA, 2010-Present, Cost: \$125K. As part of a larger effort to complete the Project-level Environmental Impact Reports (EIRs), Mr. Gegunde managed a team that successfully completed the Hazardous Materials and Waste Baseline Assessment task for the Fresno to Bakersfield Section of the proposed California High Speed Train project. The team also successfully completed the Hazardous Materials and Waste Technical Evaluations (Impacts) Report for the Fresno to Bakersfield Section, which was integrated into EIR/EIS document. Mr. Gegunde is also serving in the same capacity as Field Task Manager and Team Task Leader for the Bakersfield to Palmdale Section of the proposed California High Speed Train project. Additionally, Mr. Gegunde is performing the Due Diligence ESAs on eight sites for the Authority's Compensatory Mitigation Plan in advance of right-of-way land acquisition and critical habit set-aside program.

Technical Reviewer, District 4, United States Highway 101 (U.S. 101) Express Lanes Project, (District 4-SCL US 101-PM 25.3 to 28.6 EA 04-4A790K), California Department of Transportation, Intra-office IWA, 2011, Cost: \$7K. Mr. Gegunde provided technical review of the Hazardous Materials and Wastes sections for the Initial Site Assessment (ISA) conducted by URS for the United State Highway 101 (U.S. 101) Express Lanes Project. The project includes the proposed conversion of 40 miles of existing high-

occupancy vehicle (HOV) lanes along U.S. 101 to express lanes (also known as High Occupancy Toll [HOT] lanes). The project, located in Santa Clara County, would include the construction of express lanes on northbound and southbound US 101 from Dunne Avenue in Morgan Hill to Embarcadero Boulevard in Palo Alto. The purpose of this ISA was to identify sites that have the potential to affect the proposed project with hazardous materials or waste from current or historical environmental conditions. The format and content of the ISA followed Appendix DD, Preparation Guidelines for ISA Checklist for Hazardous Waste, of the *Caltrans Project Development Procedures Manual*.

Project Manager, Former Etcheverry Market UST Site, Madera, CA, Environmental Services T&M, 2011-Present, Cost: \$156K. The Former Etcheverry Mkt site, currently Farmer's Market, is an active grocery store and retail gasoline station located in Madera, Madera County. The soil and shallow groundwater beneath the station has been impacted by gasoline that leaked from the station's piping (since replaced with modern, double-wall equipment). URS has characterized the contaminant plume and implemented an interim remediation program utilizing high-vacuum extraction to remove soil vapor (SVE). Regulatory case closure will likely be granted in late 2013. The lead oversight agency is the California Regional Water Quality Control Board – Central Valley Region. The work is being financed by the California UST Cleanup Fund.

Project Manager and Field Task Manager, Firebaugh Mini Mart UST Site, Firebaugh, CA, Firebaugh Minimart, Environmental Services T&M, 2010-Present, Cost: \$1.3M. Firebaugh Mini Mart is an active retail gasoline station located in Firebaugh, Fresno County. The soil and shallow groundwater beneath the station was impacted by gasoline that leaked from the station's underground storage tanks and piping (since replaced with modern, double-wall equipment). Significant free-phase, floating product was present over a limited area. URS characterized the contaminant plume and implemented an interim remediation program utilizing high-vacuum, dual phase extraction to remove the floating product. A longterm remediation system utilizing in-situ ozone and hydrogen peroxide injection was installed to complete site remediation. This system included eight dual-completion injection wells and a vapor recovery trench to prevent fugitive ozone from impacting the site's dispenser island. The clean-up effort was successful and regulatory case closure was granted in early 2013. The lead oversight agency is the California Regional Water Quality Control Board – Central Valley Region. The work is being financed by the California UST Cleanup Fund.

Project Manager and Field Task Manager, Rhodes Inc. UST Site, Reedley, CA, Client, T&M, 2010-Present, Cost: \$950K. The Rhodes Inc. site is an active retail gasoline card lock station located in Reedley, Fresno County. The soil and shallow groundwater beneath the station has been impacted by gasoline that leaked from the station's piping (since replaced with modern, double-wall equipment). Significant free-phase, floating product was present over a limited area. URS has characterized the contaminant plume and implemented an interim remediation program utilizing high-vacuum, dual phase extraction to remove soil vapor and floating product. The lead oversight agency is the California Regional Water Quality Control Board – Central Valley Region. The work is being financed by the California UST Cleanup Fund.

Field Task Manager, Gill Ranch Storage Facility, Gas Leak Detection Monitoring, Madera County, CA, Gill Ranch Storage, LLC, Environmental Services T&M, 2010-Present, Cost: \$80K. The Gill Ranch Storage Facility project utilizes the 5,020-acre Gill Ranch depleted gas field to store natural gas transported through a new 30-inch natural gas pipeline connecting with the Pacific Gas and Electric Company's high pressure backbone system near the Interstate-5 corridor. The objective of the Leak Detection monitoring is to assess the level of natural gas near the ground surface, if any, during storage injection operations. Monitoring is performed using soil gas monitoring wells and temporary probes for comparison with the Baseline Leak Detection monitoring results in order to satisfy project and California Public Utilities Commission (CPUC) data requirements for monitoring any soil gas underlying the gas storage facility. Sampling is conducted pursuant to the Gill Ranch Storage Facility Gas Monitoring Plan and in accordance with the current Department of Toxic Substances Control (DTSC) *Advisory - Active Soil Gas Investigations* that incorporates the Regional Water Quality Control Board, Los Angeles Region (LARWQCB) *Interim Guidance for Active Soil Gas Investigation.*

Senior Geologist and Field Task Manager, Non-Hazardous Waste Injection Well, McKittrick, CA, Confidential Client, Intra-office IWA, 2008-2009, Cost: Confidential. Provided observation and documentation for Health and Safety and Environmental Sensitivity aspects of the completion of a deep sandstone formation Class I Non-Hazardous Waste Injection Well. The well was authorized to inject into the Olig sand zone of the Reef Ridge Formation for the purpose of disposal of industrial nonhazardous wastewater fluids. These fluids consist primarily of cooling tower blowdown from a power plant cooling process, but also include boiler and evaporative cooler blowdown, wash water, filter backwash, equipment drains, and storm water from equipment containment.

Senior Geologist, TDPI Pipeline Project, Bakersfield/Coalinga Area, CA, Chevron, Intra-office IWA, 2008, Cost: Unk. Conducted oversight and supervision of Phase II pipeline viability assessments of idled or inactive oilfield pipelines in conjunction with other Chevron-subcontracted firms. Activities included a rigorous health and safety oversight regimen. Investigation included pipeline location, intrusive activities to reveal pipelines, connection isolation, sampling pipeline wrap for asbestos, wall thickness measurements, soil sampling, pipeline cold taps, pipeline content sampling, air quality monitoring, and project field documentation including Global Positioning System (GPS) documentation.

Associate Geologist and Technical Manager, Operational Unit 1, Purity Oil Sales Superfund Site, Fresno, CA, Chevron Environmental Management Company, Environmental Services T&M, 2002– 2006, Cost: \$1.1M Oversaw the design, installation, and implementation of low flow sampling systems using QED MicroPurge® bladder pumps in 25 on- and offsite monitoring wells. Mr. Gegunde oversaw quarterly groundwater monitoring, sampling, and reporting for the extensive monitoring well network in the chlorinated solvent-impacted site. He oversaw operation and maintenance (O&M) of the groundwater extraction and treatment system including a three-vessel greensands filtration system and a high-volume VOC airstripper. Oversaw several phases of CPT and HydroPunch investigations at the site. Reported monthly progress and activities to the lead agencies including the US Environmental Protection Agency, the Regional Water Quality Control Board, and the California Department of Toxic Substances Control.

Specialized Training

2000/OSHA 40-Hour HAZWOPER w/ subsequent 8-hour refreshers 2002/OSHA 8-Hour Hazardous Waste Site Supervisor 2005/RTBU (Chevron) Loss Prevention System 2006/URS Loss Prevention System (Chevron/Exxon Mobile) 2008/Westec - Contractor Safety Orientation (BKF Area Oilfields) 2006/SJVBU (Chevron) Business Partner Orientation 2009/e-Railsafe Rail Security Awareness Training 2009/BNSF Railroad Contractor Orientation and Safety Course 2010/URS Project Management Certification Training
