Fresno, California 93720**

**URS Corporation Job No.
18715320**

July 2013

Executive Summary

URS has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of a single parcel comprising approximately 1.36-acres of land located in Fresno, Fresno County, California (subject property). The parcel is a parking lot located at 1258 Broadway and 1821 Broadway Plaza. There are two small vacant parcel islands associated with the subject property located across Broadway, north of the main subject property parcel. The County Assessor's parcel number is 466-214-17T.

Based on review of historical documents, the subject property appears to have been located in an area of downtown urban development dating back to 1885 when the first developments on the site were single-family residential dwellings, two paint shops; a livery stable and a hay shed. During the late 1890s and early 1900s the subject property was developed commercially with retail businesses including two blacksmith shops.

Commercial development of the subject property was predominate through the 1950s and into the early 1960s including an auto garage and storage facilities; two gasoline service stations; and a bus depot. By 1970 all structures had been removed from the subject property and it had been converted to a commercial parking lot similar to the present-day configuration and activities.

This assessment identified no Recognized Environmental Conditions (RECs) in connection with the subject property.

This assessment has revealed evidence of five potential items of concern in connection with the subject property.

Commercial uses of the subject property date back to 1885. Several historical uses suggest that hazardous substances may have been used, stored, or discarded on portions of the subject property that could have impacted localized shallow soils at the site, including:

- 1885 – Two paint shops (potential for solvents, lead, petroleum hydrocarbons);
- 1898 – Two blacksmith shops (potential for heavy metals);
- 1918 – An auto repair shop (potential for solvents, heavy metals, petroleum hydrocarbons); a blacksmith shop (potential for heavy metals); a leather cleaning and dying shop (potential for solvents and petroleum hydrocarbons);
- 1948 – Two gasoline service stations (potential for solvents, heavy metals, petroleum hydrocarbons).
- 1970 – An auto service station with gasoline and oil service (potential for solvents, heavy metals, petroleum hydrocarbons).

For the reasons discussed in Section 8.2 of the ESA, it is URS' opinion that there is a low likelihood that significant environmental liability exists regulated to the historical activities of auto repair shops, gasoline service stations, blacksmith shops and other potentially hazardous activities on the subject property parcel and no further investigations appear warranted.

1.0 INTRODUCTION

1.1. Purpose

This report documents the methods and findings of a Phase I Environmental Site Assessment (ESA) conducted by URS Corporation (URS) for the Successor Agency to the Redevelopment Agency of the City of Fresno (Agency, Client). The purpose of the Phase I was to evaluate environmental conditions associated with the subject property and neighboring properties and assess whether any recognized environmental conditions (RECs) exist at the subject property.

1.2. Detailed Scope of Services

The scope of services consisted of visual observation of site conditions during a site visit; review of practically reviewable and reasonably ascertainable information on historical site usage, and surface and subsurface conditions; and review of information provided by individuals, public agencies, and others. The services provided by URS were performed under a written contract with the Agency, and authorized by the Agency's Notice to Proceed dated February 27, 2013. Authorization to proceed with this Phase I ESA was received by email on April 17, 2013 from Mr. Enrique Mendez, representing the Agency.

The following specific tasks were performed by URS:

- Reviewed pertinent, available documents and maps regarding local physiographic and hydrogeologic conditions in the vicinity of the subject property;
- Reviewed and interpreted available historical sources (e.g., topographic maps, Sanborn Fire Insurance maps, aerial photographs, city directories) of the subject property and immediate vicinity from readily available sources;
- Reviewed available documents regarding past and/or current site development (e.g., previous environmental and geotechnical investigations, site maps, environmental permits, records of hazardous materials generation, use, storage and/or disposal);
- Reviewed a database report of available federal, state, and local agency lists including, but not limited to: (a) known or potential hazardous waste sites or landfills; (b) sites currently under investigation for environmental violations; (c) sites which manufacture, generate, use, store, and/or dispose of hazardous materials or hazardous waste; (d) sites which have underground storage tanks (USTs); and (e) sites with recorded violations of regulations concerning USTs and hazardous materials/hazardous wastes. This task was intended to identify whether the subject property is listed or whether facilities in the area may have impacted environmental conditions at the subject property;
- Performed a reconnaissance survey of the subject property to make visual observations of existing conditions and activities, and performed a drive-by survey of the area within an approximate one-half-mile radius of the subject property to observe general land uses within the search area;
- Conducted interviews with the subject property owner, occupant, manager, and/or others knowledgeable, as appropriate, regarding history and operations at the subject property;
- Conducted inquiries with applicable federal, state, and municipal regulatory agencies for information regarding building or environmental permits, environmental violations or incidents, and/or status of enforcement actions at the site; and
- Prepared this Phase I ESA report describing the investigation performed and presenting URS' findings, professional opinions, and recommendations regarding the potential for environmental contamination at the subject property.

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

Additional work scope elements included:

- A visual review of wetlands was made during the site reconnaissance, including looking for saturated soils, wetland-type vegetation, or fill areas. In addition, Federal Emergency Management Agency (FEMA) Flood Maps and zoning records were reviewed and findings are included in this report; and
- An evaluation of the potential for elevated indoor radon levels based upon review of the National Radon Database developed by the U.S. Environmental Protection Agency (USEPA) and readily available.

1.3 Significant Assumptions

No significant assumptions were made as part of this Phase I ESA.

1.4 Limitations and Exceptions

URS conducted this Phase I ESA in general accordance with the ASTM Standard Practice for Environmental Site Assessments: Phase I Site Assessment Process (E 1527-05) and the USEPA's Standards and Practices for All Appropriate Inquiries: 40 CFR Part 312 (AAI). However, uncertainty is not wholly eliminated when conducting Phase I ESAs, and the investigations are not exhaustive. The environmental professionals involved used reasonable limits of time and cost when performing the work.

Deviations from the standard scope of services that occurred during the performance of this Phase I ESA are discussed in detail in Section 10.0.

1.5 Special Terms and Conditions

This Phase I ESA was not subject to any special terms or conditions.

1.6 User Reliance

This Phase I ESA report is intended solely for the use of Agency for the purpose indicated in Section 1.1.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property consists of a single parcel comprising approximately 1.36-acres of land located in Fresno, Fresno County, California (subject property). The parcel is a parking lot located at 1258 Broadway and 1821 Broadway Plaza. There are two small vacant parcel islands associated with the subject property located across Broadway, north of the main subject property parcel. The County Assessor's parcel number is 466-214-17T. A Site Location Map is presented as Figure 1.

2.2 Site and Vicinity General Characteristics

Based on a review of historical documents, parcel number 466-214-17T has been developed as a parking lot for commercial use since the 1960s when the Fresno Redevelopment Agency (RDA) acquired the property.

The Site is located in an area currently zoned CF (Central Fresno). Based on the neighborhood reconnaissance, the area is characterized by mixed uses, including predominantly retail and commercial development with Masten Towers located north east of the parcel. The former Hotel Fresno is located east of the two small vacant parcel islands and located across Broadway, north of the main subject property parcel. Photographs of the Site are provided in Appendix A.

2.3 Current Use of the Site

The main subject property parcel is currently utilized as a commercial parking lot operated by Ace Parking Management and available with permitted parking only. A Site Map is presented as Figure 2.

2.4 Description of Structures, Roads, and Other Improvements

The main subject property parcel is a commercial parking lot with no significant improvements other asphalt pavement, parking stall stripping, and several lighting fixtures.

2.5 Current Use of Adjoining Properties

URS observed the following features of neighboring properties at the time of the site visit. Our evaluation of these properties was limited to conditions visible from the site and from public rights-of-way.

- North: Broadway Plaza and Hotel Fresno (vacant).
- East: Broadway Plaza and commercial buildings including Masten Towers and to the southeast beyond Fresno Street, the Crest Theater.
- South: An exit ramp from west-bound Fresno Street to H Street; Fresno Street and then additional parking (Merchant's Lot).
- West: H Street; then additional parking (Boxcar Lot).

3.0 USER-PROVIDED INFORMATION

3.1 Title Records

URS obtained property title information from the County of Fresno Tax Assessor. The subject property is owned by the Successor Agency to the Redevelopment Agency of the City of Fresno.

3.2 Environmental Liens or Activity Use Limitations

URS requested information related to environmental liens and activity or use limitations (AULs) from Environmental Data Resources, Inc. (EDR). EDR was not able to provide any information regarding environmental liens or AULs for the subject property. A copy of the Environmental Lien Search Report is included as Appendix B.

3.3 Specialized Knowledge

URS submitted a User Questionnaire per AAI standards to Mr. Enrique Mendez, representing the Agency, regarding specialized user knowledge of the subject property. Mr. Mendez stated that, to the best of his knowledge, there are no known environmental concerns associated with the subject property, and that there are no environmental liens or activity or use limitations associated with the subject property.

3.4 Commonly Known or Reasonably Ascertainable Information

URS requested whether the Agency was aware of any commonly known or reasonably ascertainable information within the local community about the subject property that might result in the finding of a REC in connection with the subject property. Mr. Mendez was not aware of any such information.

3.5 Valuation Reduction for Environmental Issues

URS requested whether the Agency is aware of any reduction in value of the subject property that might be associated with the finding of a REC in connection with the subject property. Mr. Mendez was not aware of any such reduction in value.

3.6 Owner, Property Manager, and Occupant Information

The Successor Agency to the Redevelopment Agency of the City of Fresno is the owner of the subject property. Ace Parking Management, Inc. operates the by-permit only parking facility that occupies the subject property main parcel; the two island parcels north of Broadway are vacant. Ace Parking manages more than 450 locations throughout the southern and western United States. The regional office is located at 2125 Kern Street, suite #101, Fresno, CA 93721 (559-264-6422). According to representatives of ACE Parking contacted by telephone, no activities are conducted on the subject property that represents a potential recognized environmental concern.

3.7 Reason for Performing this Phase I ESA

The Agency wants an assessment of recognized environmental concerns (RECs); historical recognized environmental conditions (HRECs) and items of concerns (IOCs) that may be present on the subject property.

4.0 RECORDS REVIEW

URS contracted with EDR to conduct a review of applicable regulatory agency lists of known and potential hazardous waste sites, properties or facilities currently under investigation for potential environmental violations, and those sites storing or using hazardous materials. URS utilized the ASTM Standard with respect to list search radii for Phase I ESAs (ASTM E 1527-05). Documents and lists were reviewed to identify properties or facilities located within the site vicinity that may have the potential to adversely impact environmental conditions at the Site. The complete list of reviewed databases is provided in the EDR report, included in Appendix C, and is summarized in the following table.

4.1 Standard Environmental Records Sources

The following table presents the EDR database report results for the standard environmental records.

Agency Database	Survey Distance	Number of Sites Identified
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	0.5 miles	3
CERCLIS No Further Remedial Action Plan (CERCLIS NFRAP)	0.5 miles	1
U.S. EPA RCRA Registered Treatment Storage and Disposal (RCRA-TSDF)	0.5 miles	1
U.S. EPA RCRA Registered Large Quantity Generators of Hazardous Waste (RCRA-LQG)	0.25 miles	1
U.S. EPA RCRA Registered Small Quantity Generators of Hazardous Waste (RCRA-SQG)	0.25 miles	14
U.S. EPA RCRA Registered Conditionally Exempt Small Quantity Generators (RCRA-CESQG)	0.25 miles	1
State Site Mitigation and Brownfields Reuse Program (ENVIROSTOR) database	1.0 miles	6
State Leaking Underground Storage Tank (LUST) List	1.0 miles	34
State Spills, Leaks, Investigation & Cleanup Cost Recovery Listing (SLIC)	0.5 miles	5
State Underground Storage Tanks (UST) Lists	0.25 miles	5
Voluntary Cleanup Sites	0.5 miles	1
State Listing of Recycling Facilities (SWRCY).	0.5 miles	1
HIST Cal-Sites	1.0 miles	1
State Facility Inventory Database (CA FID UST) of historic active and inactive UST locations	0.25 miles	13
State Hazardous Substance Storage Container Database (HIST UST) of historic UST sites	0.25 miles	8
Statewide Environmental Evaluation and Planning System (SWEEPS UST)	0.25 miles	14
U.S. EPA RCRA Non Generators	0.25 miles	1
Hazardous Substance Cleanup Bond Act (CA BOND EXP. PLAN)	1.0 miles	1
State Historical Hazardous Waste and Substances Sites (HIST CORTESE)	0.5 miles	23
CUPA Listings	0.25 miles	39
Proposition 65 Records (Notify 65)	1.0 miles	1
Cleaner Facilities (DRYCLEANERS)	0.25 miles	1
Permitted Hazardous Waste Facilities Database (HWP)	1.0 miles	1
EDR Proprietary Manufactured Gas Plants (MGP)	1.0 miles	1
EDR Exclusive Historic Gas Stations (US Hist Auto Stat)	0.25 miles	86
EDR Exclusive Historic Dry Cleaners (US Hist Cleaners)	0.25 miles	16

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

Three sites were identified with addresses associated with the subject property parcel. All four sites were identified in the EDR US Historical Auto Stations database:

- Subway Garage & Motor Parts – 1200 H Street
- Dolson & Anderson (a.k.a. Dalma Garage) - 1219 Broadway
- R.D. Heppner – 1829 Fresno Street

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the subject property or adjacent to the subject property for the following key databases:

- National Priority List
- Federal RCRA CORRACTS Facilities List
- Federal Institutional Controls/Engineering Controls Databases
- Federal ERNS List
- State and Tribal Equivalent NPL (RESPONSE)
- State and tribal landfill and/or solid waste disposal site lists (SWF/LF)
- Toxic Pits Cleanup Act Sites
- CDL Clandestine Drug Labs
- US HIST CDL National Clandestine Laboratory Register
- HMIRS Hazardous Materials Information Reporting System
- CHMIRS California Hazardous Material Incident Report System
- LDS Land Disposal Sites Listing
- Cortese Hazardous Waste & Substances Sites List
- SPILLS 90 data from FirstSearch
- HAZNET Facility and Manifest Data

Based on groundwater monitoring data from a nearby site, regional groundwater is expected to flow to the northeast (see Section 4.3). Therefore, sites southwest of the subject property are considered to be up-gradient with respect to groundwater flow direction.

The following sites, including those in the Orphan Summary, were identified within the ASTM-specified search distance for each of the public databases reviewed.

LUST Listing

A review of the LUST list, as provided by EDR has revealed that there are 42 LUST sites within approximately 0.5 miles of the subject property. Thirty eight of the LUST sites are closed sites and therefore are not expected to have a significant negative environmental impact on the subject property. Three of the open LUST sites are under remediation: Archive Record Storage and Fire Station #3 are 0.469 mile and 0.325 mile, respectively and cross-gradient of the subject property. The third open LUST site under remediation, Greyhound Lines 1033 Broadway is 0.194 miles and cross-gradient from the subject property. One open LUST site, Bedrosian Truck Service 1454 G Street, is 0.242 mile up-gradient and under Site Assessment. Based on distance from the subject property, status of remediation of the sites, and a review of the status of these four sites on the State's GeoTracker database, none of the State LUST cases is considered a REC for the subject property.

CERCLIS

A review of the CERCLIS list, as provided by EDR, has revealed that there are 3 CERCLIS sites within approximately 0.5 miles of the subject property. The three sites listed appear to be one unique location. The PG&E Gas Plant - Fresno site is located 0.251 miles south (up-gradient) from

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

the subject property with closed-case status and no violations reported. Based on this information, this site is not expected to have a significant negative environmental impact on the subject property, and therefore is not a REC for the subject property.

RCRA Small Quantity Generators of Hazardous Waste (RCRA-SQG)

A review of the RCRA-SQG list, as provided by EDR, has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the subject property. No violations are reported for these sites. Therefore, these listings are not expected to have a significant negative environmental impact on the subject property, and are not considered RECs for the subject property.

RCRA Large Quantity Generators of Hazardous Waste (RCRA-LQG)

A review of the RCRA-LQG list, as provided by EDR has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property. CVS Pharmacy is located 0.073 mile down-gradient of the subject property with no violations. Based on this information, this listing is not expected to have a significant negative environmental impact on the subject property, and is not considered a REC for the subject property. VOPAK USA Incorporated (formerly Van Waters and Rogers) is located at 1152 G Street and is under remediation for tetrachloroethene (PCE) contamination to soil and groundwater. The site is located 0.179 miles up-gradient in relation to the subject property. According to the State GeoTracker Database, data from nearby monitoring wells submitted to the State Water Resources Control Board in June 2008 indicated that the well was non-detect for all volatile organic compounds including PCE. Based on this information, this listing is not expected to have a significant negative environmental impact on the subject property, and is not considered a REC for the subject property.

SLIC Listing

A review of the SLIC list, as provided by EDR, has revealed that there are 5 SLIC sites within approximately 0.5 miles of the subject property. None of the 5 sites are expected to have a significant negative environmental impact on the subject property due to inactive status, closed investigation status, distance, and/or groundwater flow direction, and are not considered RECs for the subject property.

State UST Lists (CA FID UST, UST, HIST UST, SWEEPS UST)

Twelve total unique State UST sites were identified within 0.25 miles of the subject property. Those sites with reported leaks are listed in the LUST or SLIC databases and were discussed above. The remaining sites are not listed in other databases indicating a release and therefore they are not expected to have a significant negative environmental impact on the subject property and are not considered RECs.

ENVIROSTOR database

Six ENVIROSTOR sites were identified within approximately one mile of the subject property. Two up-gradient sites (Dumittras Used Tire 1152 G Street and PG&E Manufactured Gas Plant 1131 G Street) are less than 0.2 mile of the subject area however have no violations reported and therefore are not expected to have a significant negative environmental impact on the subject property, and are not considered a REC for the subject property. None of the on the ENVIROSTOR list are not considered RECs due to NFA status, closed investigation status, distance, and/or being located cross- or down-gradient relative to the subject property.

State Historical CORTESE List (HIST Cortese)

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

A review of the HIST CORTESE list, as provided by EDR, has revealed that there are 25 HIST CORTESE sites within approximately 0.5 miles of the target property. Twenty one of the sites are closed LUST cases. Closed sites are not expected to have a significant negative environmental impact on the subject property and therefore these sites are not considered RECs. The 4 remaining sites, are discussed in the LUST database section above, and are not expected to have a significant negative environmental impact on the subject property due to distance or their location cross- or down-gradient relative to the subject property and therefore are not considered RECs for the subject property.

Other Databases

Additional databases with sites listed in the proximity of the subject property include:

- Voluntary Cleanup Sites (VCP) – PG&E Manufactured Gas Plant at 1131 G Street is not a REC and is discussed in the CERCLIS section;
- State Listing of Recycling Facilities (SWRCY) – Williams Restaurant at 1435 Fresno Street is listed and is not considered an REC due to distance (0.196 miles) and lack of violations;
- Historical California potential hazardous substance sites (HIST Cal-Sites) – PG&E Manufactured Gas Plant/Substation at 1131 G Street is not a REC and is discussed in the CERCLIS section above;
- Notify 65 – Ace Service, Inc. at Broadway and Ventura Street is located 0.542 miles from the subject property and cross-gradient. Based on the distance and cross-gradient position of the site relative to the subject property, it is not considered a REC for the subject property.
- Permitted Hazardous Waste Facilities (HWP) Databases – VOPAK USA Incorporated (formerly Van Waters and Rogers) is located at 1152 G Street and is under remediation for tetrachloroethene (PCE) contamination to soil and groundwater. The site is located 0.179 miles up-gradient in relation to the subject property. This site is not a REC for the subject property and is discussed in the RCRA-LQG section above;
- DRYCLEANERS – Lamoures, Inc. site is located 0.25 miles up-gradient from the subject property at 1304 G Street. According to the State GeoTracker database, soil impact was confirmed during assessment for a nearby site. The responsible party is required to conduct soil vapor assessment. A Cleanup and Abatement order (CAO) was issued to the responsible party. The responsible party has not complied with the CAO to date. Enforcement is currently being reviewed. Given the distance to the subject property and that only soil contamination has been identified at the site, this listing is not expected to have a significant negative environmental impact on the subject property, and is not considered a REC for the subject property;
- EDR US Historical Cleaners - A review of the EDR US Historical Cleaners list, as provided by EDR, has revealed that there are 16 US Historical Cleaners sites within approximately 0.25 miles of the subject property. None of the sixteen sites are adjacent to the subject property. Fifteen of the sites are located down- or cross-gradient to the subject property. The remaining site, Lamoures, Inc., is discussed in the DRYCLEANERS section above.
- Hazardous Substance Cleanup Bond Act (CA BOND EXP PLAN) – The Fresno County Employee's Credit Union site at 2211 Merced Street is a closed LUST site and is located 0.28 miles down-gradient and therefore is not considered a REC for the subject property;

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

- Manufactured Gas Plants – PG&E Manufactured Gas Plant at 1131 G Street is not a REC and is discussed in the CERCLIS section above.

Orphan List

A review of the Orphan List did not identify any contaminated sites recognized as near the subject property.

4.2 Historical Use Information on Subject property and Adjoining Properties

URS requested EDR to search four different types of historical records for the subject property and surrounding properties:

- Historical Aerial Photographs
- Historical Topographic Maps
- Sanborn Fire Insurance Maps
- City Directories

The results of these record searches for the subject property and the surrounding area are summarized below.

Historical Aerial Photographs

URS examined historic aerial photographs of the 1258 Broadway and 1821 Broadway Plaza obtained from EDR for the years 1946, 1957, 1965, 1972, 1984, 1987, 1998, 2005, 2006, 2009, 2010, and 2012. A description of these aerial photographs is presented in Table 1. No RECs were identified through this review. A copy of the Historical Aerial Photographs is provided in Appendix D.

Table 1 – Summary of Aerial Photograph Review for 1258 Broadway; 1821 Broadway Plaza	
Year of Photo	Finding
1946	The image is grainy and details are difficult to discern, but the subject property is developed with several structures as part of downtown Fresno.
1957	The subject property remains part of the downtown area and is developed with multiple large commercial structures. Visible in the photograph is the former Hotel Fresno. The city block containing the subject property parcel is bounded by Fresno Street on the south, Broadway on the east, Merced Street on the north, and H Street on the west.
1965	Several structures on the subject property and in the general vicinity have been removed and only foundations appear to remain.
1972	The image is grainy and details are difficult to discern. One long narrow structure remains at the southern end of the subject property main parcel, along Fresno Street. The subject property is still contiguous with the parcel that contains the former Hotel Fresno. Merced Street is no longer visible north of the former Hotel Fresno structure and the confluence of H Street and Broadway have been realigned to the west of the subject property. Broadway Plaza remains to the east.
1984, 1987, 1998	The image is grainy and details are difficult to discern. The subject property appears to be an undeveloped, unpaved vacant lot; however the subject property main parcel is now separated from the Hotel Fresno parcel by present-day Broadway Plaza. The present-day subject property parcel islands appear as vacant land.
2005, 2006, 2009, 2010, 2012	The subject property appears to be paved and developed as a commercial parking lot. The city block and vicinity appear developed similar to present day appearance.

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

Historical Topographic Maps

URS reviewed historic topographic maps provided by EDR for the subject property and surrounding areas and dated 1942, 1946, 1963, 1972, and 1981. A description of these maps is presented in Table 2. No RECs were identified through this review. A copy of the Historical Topographic Maps is provided in Appendix E.

Table 2 – Summary of Topographic Map Photograph Review	
Year of Map	Finding
1942	The subject property and surrounding areas are shown as part of a downtown area; due to the scale of the map, site specific details are difficult to discern. The San Joaquin River appears to the northwest of the subject property.
1946 1963 1972 1981	The subject property and surrounding areas are shown as part of a downtown area; due to the scale of the map, site specific details are difficult to discern. The San Joaquin River appears to the northwest of the subject property. The Fresno County Courthouse is clearly landmarked near the subject property.

Sanborn Fire Insurance Maps

URS also contacted EDR to obtain Sanborn fire insurance maps for the subject property and surrounding area and dated 1885, 1888, 1898, 1906, 1918, 1948, 1950, and 1970. A description of these maps is presented in Table 3. No RECs were identified through this review. A copy of the Sanborn Fire Insurance Map search results is provided in Appendix F.

Table 3 – Summary of Sanborn Map Photograph Review for 1258 Broadway; 1821 Broadway Plaza	
Year of Map	Finding
1885	The subject property appears on the west corner of Fresno Street and I Street. The development on the subject property consists of two paint shops facing Fresno Street; a livery stable and feed store and a residential dwelling facing I Street; two residential dwellings facing H Street; a hay shed and several smaller storage sheds. No development appears to the northern end of the parcel near Merced Street. A northwest/southeast trending alley bisects the subject property parcel.
1888	The paint shops at the corner of Fresno Street and I Street have been replaced with a hotel. Generally the subject property is developed as on the 1885 map. A wood yard now appears on the corner of Fresno Street and H Street.
1898	The south portion of the subject property at Fresno Street and H Street is developed as the Fresno Horse Market, Livery, Feed and Sale. The Hotel at the corner of Fresno Street and I Street is gone and a blacksmith shop is located slightly west of the former hotel site. Enterprise Livery and Feed Stable and several sheds are located on the subject property at the corner of Merced Street and H Street. A Junk yard, print shop, and a second blacksmith shop appear near the corner of Merced Street and I Street. Three residential dwellings remain on the subject property.
1906	No significant changes to the surrounding area or subject property are apparent.
1918	Significant changes have occurred to the subject property and vicinity. There are commercial structures on the corner of Fresno Street and I Street that house a cigar factory, liquor store, restaurant, and professional offices facing I Street. A blacksmith shop remains to the west facing Fresno Street. A wholesale produce market is located on the corner of Fresno Street and H Street. Facing H Street is the Valley Truck & Transfer Co. General Storage Facility. On the corner of H Street and Merced Street are the Transfer Co. Storage facility and A.B.C. Garage and Auto Storage facility facing Merced Street. The Hotel Fresno appears on the corner of Merced Street and I Street facing I Street. Southeast of the Hotel Fresno is commercial and retail development including a leather cleaning and dying shop, auto sales showroom, a printing and storage facility and several office suites.
1948	I Street is now Broadway. The blacksmith shop facing Fresno Street is now a gasoline station. The wholesale produce market located on the corner of Fresno Street and H Street is now an auto repair facility with a gasoline and oil department. An additional parking garage appears southeast of the Hotel Fresno

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

	facing Broadway.
1950	There are no significant changes to the subject property and vicinity between the 1948 and 1950 maps.
1970	Most of the structures have been removed from the subject property. A bus depot facing Fresno Street appears on the corner of Fresno Street and Broadway. An auto service station with gas and oil service appears north of the intersection of Fresno Street and H Street. The Hotel Fresno remains at the corner of Merced Street and Broadway. The confluence of H Street and Broadway has been realigned to the west of the subject property.

City Directories

URS requested a City Directory Abstract from EDR for related subject property addresses. A copy of the City Directory Abstract is provided in Appendix G. The following listings were associated with the subject property:

1801 Fresno

1927 – Valley Electrical Supply Company

1827 Fresno

1927 – Sierra Oil Co., gasoline station

1910 Tuolumne

1932, 1937, 1942, 1947, 1952 – Richard Heppner, gasoline station

1958 - Vacant

1245 H Street

1947, 1958 – Southern Pacific Co., warehouse

1952 – Valley Fruit Company

1965 – Hecht Fast Freight Inc., wholesale warehouse

4.3 Physical Setting Sources

Geology

The subject property is located in California's San Joaquin Valley. The San Joaquin Valley is approximately 400 miles long and averages 50 miles wide encompassing approximately 20,000 square miles. According to groundwater monitoring reports available through the State of California's GeoTracker system, the valley is a large asymmetric trough that is bounded by granitic, metamorphic, and marine sedimentary rocks of pre-tertiary age. The San Joaquin Valley is bounded by the granitic Sierra Nevada batholith to the east and the metamorphic Franciscan assemblage on the west. This trough has been filled with as much as 30,000 feet of sediment in the San Joaquin Valley portion to the south, and as much as 60,000 feet of sediment in the Sacramento Valley portion to the north. The age of the sediments range from Jurassic to Holocene and include both marine and lacustrine deposits (Matthews, 1965).

The subject Site lies within the low alluvial plains and fans of the San Joaquin Valley, between the Coastal Range and the Sierra Nevada Mountains. The alluvial plains and fans extend across the San Joaquin Valley from the Sierra Nevada Mountain front to the east side of the Coastal Range where they blend with the alluvium derived from the Coastal Range marine sediments.

Soils

The soils in the Fresno area primarily belong to the Great Valley Sequence. These soils are a variety of marine and lacustrine deposits ranging in age from Late Jurassic to Cretaceous. The oldest soils are Pleistocene lacustrine deposits with low permeability. The youngest soils include Quaternary stream channel deposits and alluvial deposits formed from the erosion of the granitic batholith to the

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

east (Matthews, 1965). These deposits lie on undulating low terraces with slopes of 0 to 9 percent (Straham, 1914). The upper four feet is composed of a red loam duripan. These soils have a significantly low permeability. Most water-bearing materials are Late Tertiary and Quaternary in age.

According to the US Department of Agriculture Soil Conservation Service National Cooperative Soil Survey, the dominant soil composition in the general area of the subject property is Hanford sandy loam, characterized by moderate infiltration rates with deep and moderately deep, well and moderately well-drained soils with coarse textures.

Topography

The Site is located in Section 4, Township 14 South, Range 20 East. Topographic map coverage of the site is provided by the US Geological Survey, Fresno South, California, 7.5 minute quadrangle, 1:24000 series, dated 1963, photo-revised 1981. The elevation of the site is approximately 288 feet above sea level with an increase in topographic relief to the southeast. The closest body of water is the San Joaquin River, located approximately 7 miles due north of the subject property.

Hydrogeology/Hydrology

The study area is in an area commonly referred to as the San Joaquin groundwater basin and the Kings groundwater sub-basin. This area is bounded on the north by the San Joaquin River, on the south by the Kings River, on the west by the Fresno Slough, and on the east by the Friant-Kern Canal and consolidated rocks of the Sierra Nevada (Burton et al., 2011).

No site-specific groundwater data was available for the subject property; however information obtained from GeoTracker indicates that depth to groundwater for wells in the general vicinity of the subject property was approximately 92 feet below ground surface in September 2005 and groundwater flow direction has historically been to the north-east (Nichols Consulting Engineers, 2006). In the subject area as well as in the greater San Joaquin Valley in general, snow melt run off from the Sierra Nevada and percolating irrigation water have been the primary sources of groundwater recharge since the early 1900s. Approximately 85% of groundwater is used for the irrigation of farmland (Burton et al., 2011).

No standing water or indicator species of flora and fauna typically associated with wetlands were identified on the subject property during the site reconnaissance. The EDR report did not identify any wetlands within approximately 0.5 miles of the subject site. According to EDR, in 2003 and 2011 the Federal Emergency Management Agency (FEMA) reported that the subject property is located within a 500-year flood zone.

5.0 SITE RECONNAISSANCE

Mr. Thomas Pender of URS conducted a site reconnaissance at the subject property on May 20, 2013.

5.1 Methodology and Limiting Conditions

URS' methodology is provided in Section 1.2. The purpose of the site reconnaissance was to make visual observations that enable the development of conclusions relating to the likelihood of RECs in connections with the subject property. All accessible and unobstructed exterior areas of the subject property and all interior areas or representative interior areas were observed as part of this Phase I ESA. Additionally, URS staff conducting the exterior site reconnaissance traversed the periphery of the property and other areas with storage of materials or equipment.

No limitations such as physical obstructions or access restrictions were encountered during the site visit.

5.2 General Site Setting

The subject property is a commercial parking lot acquired by the RDA in the 1960s. Surrounding properties include retail and commercial buildings and services in a generally urban, downtown setting. The parking lot was empty at the time of URS' site reconnaissance aside from vehicles in parking stalls and activities routinely associated with a commercial parking facility. No activities being conducted onsite or on adjacent properties appeared to create environmental concerns associated with the subject property parking lot.

Photographs taken during the site reconnaissance are included in Appendix A.

5.3 Solid Waste

No solid waste appeared to be generated, collected or stored on the subject property.

5.4 Hazardous Materials Handling and Storage

No hazardous materials were observed during the site reconnaissance.

5.5 Aboveground Storage Tanks

No ASTs were observed on site during the site reconnaissance.

5.6 Underground Storage Tanks

At the time of URS' site visit, evidence of USTs (e.g., fill ports, piping, or vent pipes) was not observed on the subject property.

Three sites were identified in the EDR database reports with addresses associated with the subject property parcel. All four sites were identified in the EDR US Historical Auto Stations database, however it is not known if the sites had USTs :

- Subway Garage & Motor Parts – 1200 H Street
- Dolson & Anderson (a.k.a. Dalma Garage) - 1219 Broadway
- R.D. Heppner – 1829 Fresno Street

5.7 Potential PCB-Containing Exterior Electrical Transformers

At the time of the site visit, no suspect PCB-containing items, such as transformers, were observed on the subject property.

5.8 Other Potential PCB-Containing Interior or Exterior Equipment

At the time of the site visit, no other suspect PCB-containing items were observed on the subject property.

5.9 Suspect Asbestos-Containing Materials

An asbestos survey was not conducted as part of this Phase I ESA. There was no evidence of asbestos containing materials during the site visit.

5.10 Lead-Based Paint

A limited, visual survey for lead-based paint (LBP) was conducted as part of this Phase I ESA. No LBP was observed.

5.11 Air Quality and Odors

No strong, pungent, or noxious odors were noted during the site reconnaissance.

5.12 Stains

URS did not observe evidence of stained soil or stressed vegetation on the subject property during the site visit. The asphalt parking lot contained small amounts of normal oil staining associated with vehicles, considered to be a *de minimis* condition if reported to any regulatory agency.

5.13 Radon

The subject site is located in Zone 2 on the California EPA Map of Radon Zones developed by the U.S. EPA and the U.S. Geological Survey. Buildings in Zone 2 have a predicted average indoor radon screening level between 2 and 4 picoCuries per liter (pCi/L). Frequent exposure to radon levels above 4 pCi/L is considered a potential health risk. The parking lot is not likely to become a reservoir for radon gas on the site given that there are no below grade structures or enclosed areas.

5.14 Railroad Rights-of-Way

No railroad rights-of-way are located on or adjacent to the subject property.

5.15 Surface Water

As the subject property is a paved parking lot, no bodies of water are present or are anticipated to be present. Storm water runoff is to the south, but does not impact the facility. The closest body of water is the San Joaquin River, located approximately 7 miles due north of the subject property.

URS did not observe evidence of pits, ponds, basins, or lagoons on the subject property during the site visit.

5.16 Potable Water Supply and Wells

Municipal water from the City of Fresno is provided to the subject property and properties in the area. No other source of potable water was observed on the subject property at the time of the site visit.

FINAL - Phase I ESA – Downtown Fresno Parking Lot Site, Fresno, CA

Two locations interrupted to be former monitoring well locations were observed on the subject property parcel. One location is at the west end of the main parking area along H Street and one is in one of the parcel islands located across Broadway, north of the main subject property parcel (Figure 2/Appendix A).

5.17 Wastewater and Sewer System

No wastewater is generated on the subject property due to lack of active onsite processes. Municipal sanitary sewer service is provided to the properties in the area.

5.18 Mold or Mold-like Substances

No buildings were present on the site at the time of URS' visit. URS did not observe any visual mold or mold-like substances at the time of the site visit.

6.0 INTERVIEWS

Mr. Frank Gegunde of URS conducted interviews via telephone with appropriate representatives of the subject property using the User Questionnaire per AAI standards as a guide. Information obtained through these interviews is presented below.

6.1 Interview with Owner Representative

Person interviewed: Mr. Enrique Mendez

Relationship to Subject Property: Project Coordinator, Successor Agency to the Redevelopment Agency of the City of Fresno who owns the subject property.

URS submitted a User Questionnaire per AAI standards to Mr. Enrique Mendez, representing the Owner, regarding specialized user knowledge of the subject property. Mr. Mendez stated that, to the best of his knowledge, there are no known environmental concerns associated with the subject property, and that there are no environmental liens or activity or use limitations associated with the subject property.

6.2 Interview with Key Site Manager

Person interviewed: Ace Parking Management (the telephone receptionist would not divulge her name on the telephone)

Relationship to Subject Property: *Key Site Manager*

Ace Parking Management, Inc. operates the by-permit-only parking facility that occupies the subject property. Ace Parking manages more than 450 locations throughout the southern and western United States. The regional office is located at 2125 Kern Street, suite #101, Fresno, CA 93721 (559-264-6422). According to the representative of ACE Parking contacted by telephone, no activities are conducted on the subject property that represents a potential recognized environmental concern.

6.3 Interviews with Occupants

There were no knowledgeable occupants of the subject property except the Ace Parking facility attendant who referred URS to the *Key Site Manager* noted above.

6.4 Interview with Local Government Officials

No interviews with government officials were conducted as part of this Phase I ESA.

6.5 Interviews with Others

No other interviews were conducted as part of this Phase I ESA.

7.0 FINDINGS

URS has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of a single parcel comprising approximately 1.36-acres of land located in Fresno, Fresno County, California (subject property). The parcel is a parking lot located at 1258 Broadway and 1821 Broadway Plaza. There are two small vacant parcel islands associated with the subject property located across Broadway, north of the main subject property parcel. The County Assessor's parcel number is 466-214-17T. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. The findings are presented below.

Based on review of historical documents, the subject property appears to have been located in an area of downtown urban development dating back to 1885 when the first developments on the site were single-family residential dwellings, two paint shops; a livery stable and a hay shed. During the late 1890s and early 1900s the subject property was developed commercially with retail businesses including two blacksmith shops.

Commercial development of the subject property was predominate through the 1950s and into the early 1960s including an auto garage and storage facilities; two gasoline service stations; and a bus depot. By 1970 all structures had been removed from the subject property and it had been converted to a commercial parking lot similar to the present-day configuration and activities.

7.1 Data Gaps

ASTM E 1527-05 or AAI data gaps are summarized as follows:

- No previous owner/user was interviewed because no representative was identified;
- No reasonably accessible historical use information could be located prior to 1885.

7.2 Items of Concern

This assessment identified no items of concern in connection with the subject property, except for the following:

Commercial uses of the subject property date back to 1885. Several historical uses suggest that hazardous substances may have been used, stored, or discarded on portions of the subject property that could have impacted localized shallow soils at the site, including:

- 1885 – Two paint shops (potential for solvents, lead, petroleum hydrocarbons);
- 1898 – Two blacksmith shops (potential for heavy metals);
- 1918 – An auto repair shop (potential for solvents, heavy metals, petroleum hydrocarbons); a blacksmith shop (potential for heavy metals); a leather cleaning and dying shop (potential for solvents and petroleum hydrocarbons);
- 1948 – Two gasoline service stations (potential for solvents, heavy metals, petroleum hydrocarbons).
- 1970 – An auto service station with gasoline and oil service (potential for solvents, heavy metals, petroleum hydrocarbons).

7.3 Recognized Environmental Conditions

This assessment identified no RECs in connection with the subject property.

7.4 Historical RECs

This assessment identified no historical RECs in connection with the subject property.

7.5 De Minimis Conditions

Minor oil stains were observed in the parking area on asphalt and concrete surfaces.

8.0 OPINION

8.1 Data Gaps

The data gaps discovered during this Phase I ESA are discussed above in Section 7.1. No previous owner/user was interviewed and no standard historical source was readily available discussing site use prior to 1885, when the subject property appears to have been vacant land. Based on historical site use of the subject property, it is URS' opinion that these data gaps are not significant enough to warrant further investigation.

8.2 Items of Concern

For the following reasons it is URS' opinion that there is a low likelihood that significant environmental liability exists regulated to the historical activities of auto repair shops, gasoline service stations, blacksmith shops and other potentially hazardous activities on the subject property parcel and no further investigations appear warranted:

- While the presence of these historical activities may imply the use of hazardous materials, they do not constitute a REC.
- The site has been redeveloped as a fully-paved parking facility for over 50 years.
- No evidence of soil or groundwater contamination issues was identified during interviews with site contacts or during agency database reviews.
- Based on the review and comparison of the Historical Sanborn Fire Insurance Maps with Fresno County assessor's parcel maps and other contemporary drawings and with current and historical aerial photographs, it is URS' opinion that all but one of the facilities and activities noted in Section 7.2 are not located within the current present-day subject property boundaries. The respective sites appear to be located beneath other present-day features:
 - Both paint shops; one of two blacksmith shop sites; the leather cleaning and dying shop, and both gasoline service station sites are underneath the exit ramp from west-bound Fresno Street to H Street. Furthermore, grading and paving of the exit ramp would have redistributed shallow surface soils south of the subject property main parcel in the landscaped island between Fresno Street and the exit ramp.
 - The remaining blacksmith site is beneath the former Hotel Fresno site and present-day Broadway, north of the main subject property parcel.
 - The remaining auto repair shop is located at the east end of the subject property main parcel facing Broadway, however does not appear in the historical records after 1948.

8.3 Recognized Environmental Conditions

This assessment identified no RECs in connection with the subject property.

8.4 Historical RECs

This assessment identified no historical RECs in connection with the subject property.

8.5 De Minimis Conditions

Pavement oil stains represent a *de minimis* condition that does not present a threat to human health or the environment and generally would not be subject to an enforcement action if brought to the attention of regulatory agencies.

9.0 CONCLUSIONS

URS has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of a single parcel comprising approximately 1.36-acres of land located in Fresno, Fresno County, California (subject property). The parcel is a parking lot located at 1258 Broadway and 1821 Broadway Plaza. There are two small vacant parcel islands associated with the subject property located across Broadway, north of the main subject property parcel. The County Assessor's parcel number is 466-214-17T. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of recognized environmental conditions or historical recognized environmental conditions in connection with the subject property and no further investigations appear warranted.

This assessment has revealed evidence of five potential items of concern in connection with the subject property. These observations are described in Section 7.0.

This Phase I ESA was accomplished by, and limited to, a reconnaissance of the site, a drive-by survey of the site vicinity, and review of agency databases and other records regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the site.

The services provided by URS were performed under a written contract with the Agency, and authorized by the Agency's Notice to Proceed dated February 27, 2013. Authorization to proceed with this Phase I ESA was received by email on April 17, 2013 from Mr. Enrique Mendez, representing the Agency.

10.0 DEVIATIONS

No deviations from the scope of services occurred during the performance of this Phase I ESA.

11.0 ADDITIONAL SERVICES

No additional services were included in URS' contract with RDA.

13.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The conclusions presented in this report are professional opinions based solely upon URS' visual observations of the Site and the immediate Site vicinity, and upon URS' interpretations of the readily available historical information, conversations with personnel identified by the client to be knowledgeable about the Site, and other readily available information, as identified in this report. The conclusions are intended exclusively for the purpose stated herein, at the Site indicated, and for the project indicated.

This report is intended for the sole use of the Agency. The scope of services performed during this investigation may not be appropriate for other users, and any use or re-use of this document or of the findings, conclusions, or recommendations presented herein is at the sole risk of said user.

This study was not intended to be an exhaustive investigation of any potential contamination that could exist at the subject property. Given that the scope of services for this investigation was limited, and given that no exploratory soils borings, soil, or groundwater sampling, or laboratory analyses were performed, currently unrecognized contamination may exist on the Site, and level of this potential contamination may vary across the Site.

A limited visual inspection of suspect asbestos-containing material was conducted. This inspection was not intended to substitute for an Asbestos Hazard Emergency Response Act-type survey, nor was it intended to determine the extent or limits of asbestos-containing materials that may be present. A limited visual inspection for damaged paint that has the potential to be lead-based paint was also performed; however, this visual inspection does not identify whether lead-based paint is present on the subject property.

This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment.

Opinions and recommendations presented in this report apply to site conditions and features as they existed at the time of URS' site visit and those reasonably foreseeable. They cannot necessarily apply to conditions and features of which URS is unaware and has not had an opportunity to evaluate.

The environmental professionals listed below indicate the following by signing this document:

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312."

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

This report was prepared by:

This report was reviewed by:

Senior Geologist/Deputy Project Manager

13.1 Statement of Quality Assurance

This project was conducted in accordance with URS' Quality Assurance/Quality Control (QA/QC) manual. The main QA/QC procedures (with a summary of their applicability to this project) are provided below:

- Central Files – both hard copy and electronic central files are established and file plans created to ensure all documents are maintained in an orderly fashion.
- Program Management Plan (PMP) and Task Order Instructions – A PMP that provides information related to the overall contract is prepared and provided to the program team. Once tasks are awarded under the contract, Task Order Instructions that provide deadlines, budgets, and scope of work are prepared by the Task Manager and then distributed to the team.
- Independent Technical Review (ITR) – Each report is reviewed by an experienced, qualified staff member to ensure the contract requirements are met, the standards are followed, and the conclusions are sound.
- Periodic internal audits are performed to ensure all the QA/QC requirements are met for this contract.

14.0 QUALIFICATION(S) OF ENVIRONMENTAL PROFESSIONAL(S)

Utilizing the combined resources of more than 55,000 employees in a network of offices in more than 300 cities worldwide, URS serves a variety of public sector clients at the local, municipal, state, and federal level. We work closely with private sector clients in the oil, petrochemical, natural gas, chemical, forest products, mining, power, communications, and general manufacturing industries.

URS offers a variety of environmental site assessment services designed to provide our clients with the information they require to assess the risks associated with hazardous materials, including polychlorinated biphenyls (PCBs) and asbestos; regulatory requirements; soil and foundation conditions; seismic vulnerability; wetlands; and sensitive biological resources.

URS Corporation has more than 100 offices located in the United States including Alaska and Hawaii. URS has over 2,000 personnel in California including: air quality specialists, archeologists, architects, biologists (aquatic and wildlife), construction managers/inspectors, drafters, engineers (including chemical, civil, environmental, electrical, geotechnical, industrial, mechanical, sanitary, structural, and wastewater), estimators, geologists, hydrogeologists, hydrologists, industrial hygienists, interior designers, landscape architects, permitting specialists, planners, regulatory specialists, soil scientists, surveyors, and technical writers. This combination of staff and offices make it possible for URS to provide multidiscipline services in a cost-effective manner with personnel who are experienced in local conditions and are readily available.

URS staff members have successfully completed thousands of environmental site assessments in the United States including Alaska and Hawaii. We have worked for a wide variety of clients and have participated with their legal counsel in evaluating potential environmental liability and associated costs.

The resumes of the Environmental Professionals involved in this Phase I ESA are included in Appendix H.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/04/2013 has revealed that there are 3 CERCLIS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 03/13/2013 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 12 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

PG AND E MANUFACTURED GAS PLAN	BLOCK OF F,G, FRESNO AN	SSW 1/4 - 1/2 (0.251 mi.)	AK137	102

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 59 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 16 EDR US

EXECUTIVE SUMMARY

Hist Cleaners sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Not reported
Site History: The Site is located at 1152 G Street in Fresno. The Site was historically used, from 1965 to 1986, to store bulk tetrachloroethene (PCE) in an aboveground storage tank at the northern section of the property. Soil and soil vapor surveys in 1996 indicated the presence of PCE. Several monitoring wells were installed in 1996 and showed PCE in the underlying groundwater. In 1998 a vapor extraction system was installed and ran until 2004. The extracted soil vapor is treated using two 2500-pound activated carbon vessels to remove the VOCs. Through subsequent testing a series of groundwater monitoring wells have been installed and continue to be monitored quarterly. Four new offsite SVE wells were installed during late 2008. An SVE system is currently extracting soil vapors from five vapor extraction wells located near the highest concentrations of PCE in groundwater and soil. This is located just downgradient of the site. Investigation to assess the lateral and vertical extent of impacts to groundwater is ongoing. A remediation action plan and Report of Waste Discharge has been submitted for insitu biodegradation of solvents in groundwater. Waste Discharge Requirements are currently being prepared.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Lead Agency: CENTRAL VALLEY RWQCB (REGION 5F)
Case Worker: KDJ
Local Agency: FRESNO COUNTY
RB Case Number: 5T10000907
LOC Case Number: FA0169677
File Location: Regional Board
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Diesel
Site History: Soil sampling associated with the removal and replacement of approximately 150 feet of diesel fuel product piping occurred at the site on January 22, 2010. Seven soil samples were retrieved and analyzed for total petroleum hydrocarbons (TPH) - Diesel. TPH-D was detected in three soil samples S1, S2, and S7 at 1.2 milligrams per kilogram (mg/kg), 1.7 mg/kg, and 5,600 mg/kg, respectively. On January 25, 2010, an attempt was made to collect a deeper soil sample beneath sample S7. Refusal due to hardpan was encountered just below five feet Below Surface Grade (BSG) and no additional samples were collected. It appears that a release of diesel fuel has occurred along the former product piping in the vicinity of S7.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CA BOND EXP. PLAN:

Responsible Party: BACKLOG SITE CLEANUP PLANNING REPORT

Project Revenue Source Company: Not reported

Project Revenue Source Addr: Not reported

Project Revenue Source City,St,Zip: Not reported

Project Revenue Source Desc: This site is projected to be remediated by the responsible parties with reimbursement to DHS for its oversight costs. If the RPs are unable to fund site investigation and remediation, another source of funds will need to be identified.

Site Description: The site is presently owned by the Fresno County Credit Union and was previously a gasoline station. Five underground tanks were installed at the gas station by 1953. In December, 1981, a construction firm removed three tanks and the tanks were pressure tested. One tank failed to hold pressure and was disposed of as scrap metal. It is not known what became of the other two tanks.

Hazardous Waste Desc: Soil samples taken indicate that the soils were contaminated with constituents, typically found in gasoline, down to a depth of 55 feet. Ground water was encountered at a depth of 75 feet. Soil borings from the site contained benzene, toluene, ethylbenzene, xylene, organic lead, and EDB. Water samples contained all these same contaminants with the exception of organic lead.

Threat To Public Health & Env: Ground water beneath the site shows signs of contamination by constituents of gasoline. The ground water in this area, according to the Central Valley RWQCB, is of excellent quality and is used as the main source of drinking water.

Site Activity Status: Twining Laboratories, Inc., prepared a report for Fresno County Employees Credit Union entitled "Preliminary Geotechnical Investigation, Gasoline Contamination Assessment, Proposed Credit Union Building". The report was dated May 28, 1985 and describes the field and laboratory investigation.

constituents. Benzene, a constituent of petroleum products is currently on the list of Proposition 65 chemicals as a known carcinogen. The preliminary investigation conducted at the site showed soil contamination. Further investigation will be required. The case will be referred to the California Regional Water Quality Control Board, Central Valley Region for review, future site investigations and direct further assessment work as needed. The scope of future subsurface investigation may include the determination of potential groundwater impacts.

Potential Contaminants of Concern: Gasoline
Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Site History:

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/18/2013
Date Data Arrived at EDR: 02/18/2013
Date Made Active in Reports: 03/21/2013
Number of Days to Update: 31

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map:	36119-F7 FRESNO SOUTH, CA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
FRESNO, CA

FRESNO SOUTH

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: HANFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
2	16 inches	72 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: DELHI

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	7 inches	25 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.1
3	25 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.1

Soil Map ID: 3

Soil Component Name: GREENFIELD

Soil Surface Texture: cemented

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	38 inches	42 inches	cemented	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	0 inches	16 inches	sandy loam	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
3	16 inches	38 inches	sandy loam	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

APPENDIX H
RESUMES OF ENVIRONMENTAL PROFESSIONALS

Frank L. Gegunde, PG

Senior Geologist

Overview

Mr. Gegunde is a licensed Professional Geologist. He has extensive experience in conducting all aspects of Phase I and Phase II environmental site assessments (ESAs) and is certified by the State of California as an environmental professional as defined in ASTM Standard E 1527-05, Appendix X2 pursuant to 40 CFR10 Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule.

Areas of Expertise

- Environmental Site Assessments
- Environmental Due Diligence
- Environmental Geology
- Landfill Investigations
- Groundwater Resources
- Soil and Groundwater Remediation
- Project Management
- Project Health and Safety Coordination

Years of Experience

With URS: 6 Years

With Other Firms: 6 Years

Education

BS/Geology/2000/California State University, Fresno

Registration/Certification

2005/Professional Geologist/
CA/#7998/Exp. 06/30/15

2011/URS Certified Project
Manager

Mr. Gegunde also has a thorough knowledge of soil boring and sampling techniques including continuous coring, split-spoon sampling, cone penetrometer testing technology (CPT) and Geoprobe™ direct push apparatus and in conducting bedrock fracture analysis using state-of-the-art field methods and RockWare™ stereonet software. He is well versed in monitoring well and piezometer installation methods as well as groundwater sampling and well monitoring procedures. Mr. Gegunde is proficient in the use of field-testing equipment including Hydac, YSI, Rae, and Horiba multiple parameter meters, photoionization hydrocarbon detection equipment, Explosimeters, PetroFLAG™ field hydrocarbon detection tests, and MiniTroll™ water monitoring data logger with Win-Situ or similar software. Mr. Gegunde also has conducted numerous active soil gas investigations as well as passive soil gas investigations using GoreSorber™ technology to isolate “hotspots” of contamination for further subsurface investigation.

Mr. Gegunde is an experienced Project Manager and brings organizational and supervisory skills to URS from 27 years in the dairy and transportation industries.

Project Specific Experience

Deputy Project Manager; USEPA Brownfields Assessment Grant to the Successor Agency to the Redevelopment Agency of the City of Fresno, California; 2013, Cost: \$278K. The purpose of the grant is to assess publically-owned properties via Phase I and Phase II ESAs that are potentially impacted by hazardous substances and/or petroleum and encourage the reuse of contaminated property for redevelopment in specific sites within the city of Fresno, California. The data from the environmental site assessments provided through this EPA grant will be used to compile an inventory of sites and their brownfield status (level of contamination). This information will help determine the redevelopment potential of each site and identify any necessary remediation.

Field Task Manager and Team Task Leader, California High Speed Rail Authority, Fresno, CA, Joint Venture IWA, 2010-Present, Cost: \$125K. As part of a larger effort to complete the Project-level Environmental Impact Reports (EIRs), Mr. Gegunde managed a team that successfully completed the Hazardous Materials and Waste Baseline Assessment task for the Fresno to Bakersfield Section of the proposed

California High Speed Train project. The team also successfully completed the Hazardous Materials and Waste Technical Evaluations (Impacts) Report for the Fresno to Bakersfield Section, which was integrated into EIR/EIS document. Mr. Gegunde is also serving in the same capacity as Field Task Manager and Team Task Leader for the Bakersfield to Palmdale Section of the proposed California High Speed Train project.

Technical Reviewer, District 4, United States Highway 101 (U.S. 101) Express Lanes Project, (District 4-SCL US 101-PM 25.3 to 28.6 EA 04-4A790K), California Department of Transportation, Intra-office IWA, 2011, Cost: \$7K. Mr. Gegunde provided technical review of the Hazardous Materials and Wastes sections for the Initial Site Assessment (ISA) conducted by URS for the United State Highway 101 (U.S. 101) Express Lanes Project. The project includes the proposed conversion of 40 miles of existing high-occupancy vehicle (HOV) lanes along U.S. 101 to express lanes (also known as High Occupancy Toll [HOT] lanes). The project, located in Santa Clara County, would include the construction of express lanes on northbound and southbound US 101 from Dunne Avenue in Morgan Hill to Embarcadero Boulevard in Palo Alto. The purpose of this ISA was to identify sites that have the potential to affect the proposed project with hazardous materials or waste from current or historical environmental conditions. The format and content of the ISA followed Appendix DD, Preparation Guidelines for ISA Checklist for Hazardous Waste, of the *Caltrans Project Development Procedures Manual*.

Project Manager, Former Etcheverry Market UST Site, Madera, CA, Environmental Services T&M, 2011-Present, Cost: \$156K. The Former Etcheverry Mkt site, currently Farmer's Market, is an active grocery store and retail gasoline station located in Madera, Madera County. The soil and shallow groundwater beneath the station has been impacted by gasoline that leaked from the station's piping (since replaced with modern, double-wall equipment). URS has characterized the contaminant plume and implemented an interim remediation program utilizing high-vacuum extraction to remove soil vapor (SVE). The lead oversight agency is the California Regional Water Quality Control Board – Central Valley Region. The work is being financed by the California UST Cleanup Fund.

Project Manager and Field Task Manager, Firebaugh Mini Mart UST Site, Firebaugh, CA, Firebaugh Minimart, Environmental Services T&M, 2010-Present, Cost: \$1.3M. Firebaugh Mini Mart is an active retail gasoline station located in Firebaugh, Fresno County. The soil and shallow groundwater beneath the station has been impacted by gasoline that leaked from the station's underground storage tanks and piping (since replaced with modern, double-wall equipment). Significant free-phase, floating product was present over a limited area. URS has characterized the contaminant plume and implemented an interim remediation program utilizing high-vacuum, dual phase extraction to remove the floating product. A long-term remediation system utilizing in-

situ ozone and hydrogen peroxide injection has been installed to complete site remediation. This system includes eight dual-completion injection wells and a vapor recovery trench to prevent fugitive ozone from impacting the site's dispenser island. The lead oversight agency is the California Regional Water Quality Control Board – Central Valley Region. The work is being financed by the California UST Cleanup Fund.

Project Manager and Field Task Manager, Rhodes Inc. UST Site, Reedley, CA, Client, Type of Contract, 2010-Present, Cost: \$950K.

The Rhodes Inc. site is an active retail gasoline card lock station located in Reedley, Fresno County. The soil and shallow groundwater beneath the station has been impacted by gasoline that leaked from the station's piping (since replaced with modern, double-wall equipment). Significant free-phase, floating product was present over a limited area. URS has characterized the contaminant plume and implemented an interim remediation program utilizing high-vacuum, dual phase extraction to remove soil vapor and floating product. The lead oversight agency is the California Regional Water Quality Control Board – Central Valley Region. The work is being financed by the California UST Cleanup Fund.

Field Task Manager, Gill Ranch Storage Facility, Gas Leak Detection Monitoring, Madera County, CA, Gill Ranch Storage, LLC, Environmental Services T&M, 2010-Present, Cost: \$80K.

The Gill Ranch Storage Facility project utilizes the 5,020-acre Gill Ranch depleted gas field to store natural gas transported through a new 30-inch natural gas pipeline connecting with the Pacific Gas and Electric Company's high pressure backbone system near the Interstate-5 corridor. The objective of the Leak Detection monitoring is to assess the level of natural gas near the ground surface, if any, during storage injection operations. Monitoring is performed using soil gas monitoring wells and temporary probes for comparison with the Baseline Leak Detection monitoring results in order to satisfy project and California Public Utilities Commission (CPUC) data requirements for monitoring any soil gas underlying the gas storage facility. Sampling is conducted pursuant to the Gill Ranch Storage Facility Gas Monitoring Plan and in accordance with the current Department of Toxic Substances Control (DTSC) *Advisory - Active Soil Gas Investigations* that incorporates the Regional Water Quality Control Board, Los Angeles Region (LARWQCB) *Interim Guidance for Active Soil Gas Investigation*.

Project Manager and Field Task Manager, Merced Airport Hazardous Waste Site, Merced, CA, City of Merced, Environmental Services T&M, 2009-2011, Cost: \$56K.

The Site incorporates a former hangar for light aircraft and a fire department practice facility.

Senior Geologist and Field Task Manager, Project Name, McKittrick, CA, Confidential Client, Intra-office IWA, 2008-2009, Cost: Confidential.

Provided observation and documentation for Health and Safety and Environmental Sensitivity aspects of the completion of a deep sandstone formation Class I Non-Hazardous Waste Injection Well. The well was authorized to inject into the Olig sand zone of the Reef

Ridge Formation for the purpose of disposal of industrial nonhazardous wastewater fluids. These fluids consist primarily of cooling tower blowdown from a power plant cooling process, but also include boiler and evaporative cooler blowdown, wash water, filter backwash, equipment drains, and storm water from equipment containment.

Project Manager, Phase I Environmental Site Assessments, Kern, Tulare, Fresno, Stanislaus, Los Angeles, Orange, Santa Barbara, San Bernardino, Sutter, Nevada, El Dorado, Tehama, Shasta, Inyo, and Lake Counties, CA, Confidential Client, Environmental Services T&M, 2008-2012, \$26K to \$32K: Conducted Phase I environmental site assessments for a confidential client on properties in the counties of Counties California referenced above. The Phase I ESAs were conducted with an emphasis on satisfying requirements for transferring property custodianship of multiple professional buildings between county and state agencies.

Site Auditor, Limestone Mining and Cement Manufacturing, California, Confidential Client, Environmental Services T&M, 2009, Cost: \$25K. Environmental compliance audit and site assessment of this client's mining and manufacturing sites in California.

Senior Geologist, TDPI Pipeline Project, Bakersfield/Coalinga Area, CA, Chevron, Intra-office IWA, 2008, Cost: Unk. Conducted oversight and supervision of Phase II pipeline viability assessments of idled or inactive oilfield pipelines in conjunction with other Chevron-subcontracted firms. Activities included a rigorous health and safety oversight regimen. Investigation included pipeline location, intrusive activities to reveal pipelines, connection isolation, sampling pipeline wrap for asbestos, wall thickness measurements, soil sampling, pipeline cold taps, pipeline content sampling, air quality monitoring, and project field documentation including Global Positioning System (GPS) documentation.

Project Manager, Phase I Environmental Site Assessments, Fresno, CA, Merced, CA, and Stockton, CA, Confidential Client, Environmental Services T&M, 2008, \$6K to \$8K: Conducted Phase I environmental site assessments for a confidential client on properties in Fresno, Merced, and San Joaquin Counties, California. The Phase I ESAs were conducted with an emphasis on satisfying requirements for submission of applications for siting and construction of three natural gas-fired electrical power generation plants.

Senior Geologist, Heated-oil Pipeline Project, Coalinga Area, CA, Chevron, Intra-office IWA, 2007, Cost: Unk. Conducted boring activities for a portion of the San Ardo Heated-oil Pipeline geotechnical investigation in advance of pipeline construction. Duties involved geotechnical boring and field-testing within a larger effort to assess feasibility of construction of the pipeline across geologically complex and abrupt terrain including multiple faults and landslides. Investigation included directing the drilling subcontractor to advance borings ranging

from 30 to 60 feet below ground surface using Sonic drilling technology and HQ coring methodology, collection of continuous core samples, lithologic logging, and documentation of the investigation.

Senior Geologist, Retail Environmental Phase II Site Assessments, Los Angeles Area, CA, Shell, Intra-office IWA, 2007, Cost: Unk.

Supervised field activities for a portion of the Inland Empire portfolio within a larger effort to conduct 94 Phase II ESAs in 90 days. Field tasks included responsibility for a two person team overseeing drilling at active retail stations and coordination with project management to meet project objectives and schedule. Investigation of each site included directing the drilling subcontractor to advance several hollow stem auger borings ranging from 30 to 50 feet below ground surface, collection of samples, lithologic logging, and documentation of the investigation.

Senior Geologist, Storm Water Conveyance System Cross Connection Survey, Naval Air Station Lemoore, CA, Department of the Navy, Intra-office IWA, 2007, Cost: Unk. Supervised field activities for the Illicit Connection Illicit Discharge (ICID) survey of selected storm water conveyance systems as necessary for National Pollutant Discharge Elimination System (NPDES) compliance for storm water management at NAVFAC SW facilities. Field survey methods included a review of all available as-built or best construction drawings, visual inspections, and where appropriate dye testing, smoke testing, closed circuit television inspection, and electromagnetic tracer survey. Results of the survey were documented in a comprehensive investigation report.

Senior Geologist, Powerhouse #3 Maintenance Yard, Big Creek Powerhouse #3, CA, Southern California Edison, Environmental Services T&M, 2006, Cost:\$12K. Supervised field activities including soil borings to assess the potential threat to groundwater posed by residual petroleum hydrocarbons in soil underlying SCE's former underground storage tanks (USTs) near Auberry, California. Findings from these activities were used in support of a request for no further action required determination (closure) of the Site.

Associate Geologist and Technical Manager, Operational Unit 1, Purity Oil Sales Superfund Site, Fresno, CA, Chevron Environmental Management Company, Environmental Services T&M, 2002–2006, Cost: \$1.1M Oversaw the design, installation, and implementation of low flow sampling systems using QED MicroPurge® bladder pumps in 25 on- and offsite monitoring wells. Mr. Gegunde oversaw quarterly groundwater monitoring, sampling, and reporting for the extensive monitoring well network in the chlorinated solvent-impacted site. He oversaw operation and maintenance (O&M) of the groundwater extraction and treatment system including a three-vessel greensands filtration system and a high-volume VOC airstripper. Oversaw several phases of CPT and HydroPunch investigations at the site. Reported monthly progress and activities to the lead agencies including the US Environmental Protection Agency, the Regional Water Quality

Control Board, and the California Department of Toxic Substances Control.

Project Manager, Environmental Site Assessments (Phase I/II), San Joaquin Valley and Sacramento Valley Region, CA, Multiple Clients, Environmental Services Fixed Fee, 2000–2006, \$1.5K to \$10K: Conducted Phase I environmental site assessments for GE Capital – Business Asset Funding on properties throughout the San Joaquin Valley including Fresno, Kings, and San Joaquin Counties, California. Conducted Phase I environmental site assessments and Environmental Facility Entrance Assessments for a confidential client in the health services field on properties throughout the San Joaquin Valley including Fresno, Stanislaus, Placer, Sacramento, and San Joaquin Counties, California. Conducted Phase I and Phase II environmental site assessments for Pacific Gas & Electric Company in Kern, Madera, Merced and Stanislaus Counties, California. Conducted Phase I environmental site assessment for Chevron Pipe Line Company for portions of the Wait-Midway crude oil pipeline in Kern County, California.

Project Manager, Drinking Water Availability Studies, Fresno/Madera Counties, CA, Private Landowners, Environmental Services T&M, 2005–2006, \$5.9K to \$7.8K: Conducted groundwater availability investigations and potential yield analysis for drinking water sources in the foothill regions of Fresno County and Madera County, California. Investigations included local and regional aquifer surveys for groundwater use and groundwater conditions, and pumping tests for specific yield data for wells in compliance with regulatory mandates for such testing on drinking water sources.

Field Task Manager, Blue Hills Disposal Facility, Coalinga, CA, Fresno County Department of Public Works and Planning, Environmental Services T&M, 2005 – 2006, Cost: \$62K Supervised quarterly groundwater monitoring at the former agricultural chemicals container disposal facility in southwestern Fresno County. The California Department of Toxic Substances Control requires quarterly monitoring at the site due to elevated concentrations of constituents of concern including herbicides in groundwater underlying the site. Also co-authored the revised Groundwater Monitoring Plan for the Site Corrective Action Plan.

Project Geologist and Field Task Manager, Goodyear Tire Service Centers, Multiple Locations, CA, Goodyear Tire and Rubber Company, Environmental Services Fixed Fee, 2004–2005, Cost: \$25K. Performed soil boring and sampling at multiple Goodyear Service Centers in Fresno, Madera, Kings, Kern, Stanislaus, and Placer Counties. Borings were advanced inside the Center's service bays adjacent to hydraulic lifts and oil/water separators.

Project Geologist and Field Task Manager, Woodville Solid Wastes Landfill, Tulare, CA, Tulare County Resource Management

Agency, Environmental Services T&M, 2004–2005, Cost: Unk.

Oversight of the implementation and upgrade of Detection Monitoring Plans and Evaluation Monitoring Plans (California Code of Regulations Title 27) at the Woodville solid waste landfill in Tulare County, California.

Awards

2007/2nd Quarter 2007 Outstanding Achievement Award/URS Corporation

2000/Department of Geology Special Recognition Award/California State University, Fresno

Specialized Training

2000/OSHA 40-Hour HAZWOPER w/ subsequent 8-hour refreshers

2002/OSHA 8-Hour Hazardous Waste Site Supervisor

2005/RTBU (Chevron) Loss Prevention System

2006/URS Loss Prevention System (Chevron/Exxon Mobile)

2008/Westec - Contractor Safety Orientation (BKF Area Oilfields)

2006/SJVBU (Chevron) Business Partner Orientation

2009/e-Railsafe Rail Security Awareness Training

2009/BNSF Railroad Contractor Orientation and Safety Course

2010/URS Project Management Certification Training

Overview

Thomas Pender has more than nine years experience in the areas of engineering geology, contaminant geology and hydrogeology. He has implemented complex workplans involving geotechnical, engineering and environmental geology investigations, sampling of soil gas, soil, groundwater, stormwater and surface water. Mr. Pender also has experience providing task management and field support for these types of projects including training junior staff. He frequently prepares associated project health and safety plans, workplans and reports. He has experience overseeing the installation, operations and maintenance of various remediation systems. He has experience with well installation, well development, well rehabilitation, and numerous types of aquifer testing. He has extensive lithologic logging, geophysical logging and drilling oversight experience with many subsurface drilling methods, including sonic, rotary wash, reverse rotary wash, air rotary, rock core, hollow-stem auger, and direct push in borings with depths of up to 9,200 feet. He also is experienced with field oversight and confirmation testing for contaminated soil removal actions, site grading operations and air monitoring.

Project Specific Experience Engineering Geology

Geologist, Urban and Non-Urban Geotechnical Levee Evaluations, Sacramento-San Joaquin River Delta, CA, California Department of Water Resources (DWR), T&M, 2006-2012, \$8.7M: Mr. Pender served as field geologist responsible for logging boreholes using cone penetrometer testing (CPT), mud rotary, hollow stem auger and sonic drilling technologies. Samples were collected using punch core and dry core systems as well as standard penetration test, California modified and Shelby tube methods. Mr. Pender was responsible for oversight of various drilling crews for all tasks associated with the field investigation including health and safety, drilling, sampling and grouting. Mr. Pender was also involved in inspecting and producing topographical profile diagrams of the general condition of the Levees, inspecting for areas of seepage, sand boils, landslides, slumps, erosion, etc. Mr. Pender was also responsible for marking boring locations, calling for Underground Service Alert for utility clearance on proposed boring locations, and interacting with local government agencies responsible for inspecting drilling and grouting operations. Mr. Pender was involved in developing the field techniques designed to meet the clients requests for particular information and regularly trained other URS field geologists in logging, oversight, documentation and other daily responsibilities for this project. Some of the logging was conducted with handheld PDA technology.

Geologist, Delta Habitat Conservation and Conveyance Program, Sacramento-San Joaquin River Delta, CA, California Department of

Water Resources (DWR), T&M, 2010-2012, \$2.1M: Mr. Pender served as field geologist responsible for logging boreholes using mud rotary and hollow stem auger drilling technologies. Borings were completed on land as well as overwater from barge and ship mounted drill rigs. Samples were collected using punch core and dry core systems as well as standard penetration test, California modified, Shelby and Pitcher tube methods. Mr. Pender was responsible for oversight of various drilling crews for all tasks associated with the field investigation including health and safety, drilling, sampling and grouting. Mr. Pender trained other URS and DWR field geologists in logging, oversight, documentation and other daily responsibilities for this project.

Field Geologist, Success Dam Geotechnical Investigation, Porterville, CA, U.S. Army Corps of Engineers (USACE), FFP, 2005-2006, \$1M: For this dam site, Mr. Pender was one of the field geologists responsible for logging boreholes using sonic drilling technology. The studies were conducted to evaluate whether the characteristics of the in situ geology would provide adequate foundation support for the proposed construction activities, which include the construction of a roller compacted concrete addition to the existing earthen dam. Mr. Pender was also involved in the embankment evaluation portion of the site investigation during which eight test pits were excavated on the downstream side of the dam. Mr. Pender assisted in performing density tests for soil and rock in place by the ASTM water replacement method. Mr. Pender oversaw the gradational analysis and sample size reduction procedures which were performed on the samples recovered from the test pits and made arrangements for the transportation of the samples to the laboratory.

Field Geologist, Geotechnical Investigation of Lake Isabella Dam, U.S. Army Corps of Engineers (USACE), Lake Isabella, CA, FFP, 2007-2009, \$484K: Mr. Pender was responsible for training USACE field geologists in logging procedures and selected samples for analysis.

Geologist, Gill Ranch Storage Facility, Geologic Hazards Monitoring, Madera County, CA, Gill Ranch Storage, LLC, T&M, 2010-Present. The Gill Ranch Storage Facility project utilizes the 5,020-acre Gill Ranch depleted gas field to store natural gas transported through a new 30-inch natural gas pipeline connecting with the Pacific Gas and Electric Company's high pressure backbone system near the Interstate-5 corridor. The objective of the geologic hazards monitoring is to assess for potential effects on the facility's infrastructure resulting from geological phenomenon including earthquakes and regional/local subsidence. Monitoring is performed using seismic accelerographs installed on either terminus of the facility's pipeline. Annual elevation surveys are also conducted and compared to the initial survey results in order to assess for subsidence. These actions satisfy project and California Public Utilities Commission (CPUC) data requirements for monitoring.

Field Geologist, Geotechnical Investigation for Planned Relocation of Chevron Pipeline, Alameda County, CA, Chevron Corporation,

T&M, 2006, \$673K: Mr. Pender was one of the field geologists responsible for performing soil sampling and borehole logging to a depth of approximately 100 feet, using mud rotary drilling and rock core drilling technology.

Field Geologist, Geotechnical Investigation for Planned Relocation of Chevron Pipeline, Kern County, CA, Chevron Corporation, T&M, 2006, \$42K: Mr. Pender was one of the field geologists responsible for performing soil sampling and borehole logging to a depth of approximately 100 feet, using mud rotary drilling and rock core drilling technology.

Field Geologist, Geotechnical Investigation for Planned Chevron Pipeline, CA, Fresno and Monterey Counties, CA, Chevron Corporation, T&M, 2006, \$2.6M: Mr. Pender was one of the field geologists responsible for performing soil sampling and borehole logging to a depth of approximately 100 feet, using mud rotary, hollow stem auger drilling and rock core drilling technology. Mr. Pender logged boreholes in areas where landslides had potential for impact to the planned route of the pipeline as well as at planned locations of Horizontal Directional drilling for installation of the pipeline under creek beds and at highway undercrossings. Mr. Pender was also responsible for marking some boring locations, calling for Underground Service Alert for utility clearance on proposed boring locations, and interacting with local government agencies responsible for inspecting drilling and grouting operations.

Field Geologist, Engineering Geology Investigation of Avila Beach Tank Farm, Avila Beach, CA, Chevron Corporation, T&M, 2007-2008, \$1.15M: As a field geologist, Mr. Pender was responsible for engineering geology investigation, mapping, staff oversight/training, permitting. Aerial photo review, site recon, planning and implementing subsurface investigation, HSA borings, logging, sampling, sea cliff fracture survey, seacliff retreat study, fault mapping, landslide mapping and investigation.

Field Geologist, Geotechnical Investigation of Planned Chevron Brightfield Solar Energy Plant, Bakersfield, CA, Chevron Corporation, T&M, 2009-2010, \$382K: Mr. Pender served as field geologist for this investigation of a former oilfield tank farm site. He was responsible for contractor oversight during the excavation and logging of 15 test pits, characterizing geotechnical site conditions including defining soil types, depth of fill, etc. Later, Mr. Pender was involved the site grading phase of the project. Mr. Pender was responsible for contractor oversight, verifying the appropriate compaction and moisture content of soils using a nuclear density gauge, and overseeing the characterization of lateral and vertical extents of hydrocarbon impacted soils encountered during grading, and their subsequent excavation and removal. Mr. Pender was also involved during the construction phase of the project, overseeing the excavation, fill and compaction of trenches and slab foundations dug for the emplacement of wiring, piping, conduit, etc.

Geologist, Geotechnical Investigation of Planned General Electric Tehachapi Solar Energy Plant, Tehachapi, CA, General Electric Corporation, T&M, 2011, \$150K: Mr. Pender served as field geologist for this investigation of a planned solar energy plant site. Mr. Pender was responsible for implementing a subsurface investigation, including logging and sampling hollow-stem auger borings.

Field Geologist, Geotechnical Investigation of Planned McCoy Lane Overpass, Santa Maria, CA, City of Santa Maria, T&M, 2007-2008, \$25K: Mr. Pender served as a field geologist and was responsible for implementing a subsurface investigation, including logging and sampling mud rotary borings in the right of way of California Highway 101, in support of the construction of a highway overpass for the City of Santa Maria.

Field Geologist, Application for Certification for Planned Panoche Energy Center, Fresno County, CA, T&M, 2006, \$867K: Mr. Pender served as a field geologist responsible for logging a borehole and installation of nested monitoring wells to a maximum depth of approximately 1500 feet, using mud rotary technology. Mr. Pender also oversaw the subsequent geophysical logging of these borings and well construction, development and abandonment. Mr. Pender was also involved in aquifer testing and drafting of reports in support of the Application For Certification submitted to the California Energy Commission. The site is located on an alluvial fan in western Fresno County with recognized subsidence hazards due to groundwater withdrawal and collapsible moisture deficient soils. Ground shaking is an additional significant geologic hazard at the site. The project was approved by the California Energy Commission in December 2007 and has started commercial operation.

Field Geologist, Fractured Bedrock Aquifer Characterization Bakersfield VA Cemetery, Bakersfield, CA, U.S. Department of Veteran Affairs, FFP, 2007-2008, \$62.5K: Mr. Pender served as a field geologist and oversaw borings drilled by air rotary method to 1000 ft depths in support of the characterization of a fractured bedrock aquifer for supply well potential.

Geologist, Urban Water Management Plan, Tulare, CA, City of Tulare, Water Resources Planning, T&M, 2006-2007, \$92K: Mr. Pender supported the development of an Urban Water Management Plan in accordance with California Department of Water Resources requirements. A key challenge of the project was the coordination with other water resource agencies surrounding the City to develop a comprehensive water resource management plan that encompassed groundwater, treated wastewater reuse, storm water management and alternative water supplies.

Field Geologist, Construction and Testing of Wastewater Injection Wells, Panoche Energy Center, LLC., Fresno County, CA, T&M, 2008-2009, \$1.5M: Mr. Pender served as a geologist responsible for

contractor oversight, borehole logging, construction oversight and documentation for the drilling and construction of four injection wells, to a maximum depth of 9,200 feet, used to dispose of waste water produced during the operation of a natural gas fired power plant. Mr. Pender also oversaw geophysical logging and sidewall core sampling of these borings at the completion of each significant drilling interval and also oversaw mechanical integrity testing, well development and surface completions. Mr. Pender was also involved in aquifer testing including step rate tests, constant pump rate tests, and was involved in the generation of completion reports in support of the permitting process. Mr. Pender also assisted in producing quarterly operation reports submitted to the Underground Injection Control Department of the EPA following the completion of the wells.

Geologist, Installation, Testing and Repair of Wastewater Injection Wells, La Paloma Generating Center, McKittrick, CA, T&M, 2008, \$400K:

Mr. Pender served as a field geologist responsible for contractor oversight, borehole logging, construction oversight and documentation for the drilling and construction of an injection well, to a depth of 6,000 feet, used to dispose of waste water produced during the operation of a natural gas fired power plant. Mr. Pender also oversaw geophysical logging and sidewall core sampling of these borings at the completion of each significant drilling interval and also oversaw mechanical integrity testing, well development and surface completions. Mr. Pender was also involved in aquifer testing including step rate tests, constant pump rate tests, and numerous workover operations including the installation of a sand screen liner to prevent the intrusion of fine grained sand.

Field Geologist, Construction and Testing of Water Production Wells, Panoche Energy Center, Fresno County, CA, T&M, 2008-2009, \$3.2M:

Mr. Pender served as a geologist responsible for contractor oversight, borehole logging, construction oversight and documentation for the drilling and construction of two production wells using reverse rotary wash drilling technology, including the installation of pumps, pump motors, and columns. The two 18-inch diameter wells are approximately 1,400 feet deep and are capable of producing in excess of 2,000 gpm each. They are used to supply water for the operation of a 400 mega-watt natural gas fired power plant. Mr. Pender also oversaw geophysical logging of these borings at the completion of each significant drilling interval and well development/water quality assessment. Mr. Pender was also involved in aquifer testing, including step and constant rate tests, and generation of completion reports in support of the permitting process.

Field Geologist, Geologic/Hydrologic Studies, Madera County, CA, Quad-Knopf, Inc, FFP, 2003-2004, \$163K:

Mr. Pender was the field geologist for geologic/hydrologic studies conducted to support preparation of Environmental Impact Reports. The investigations included: (1) CPT borings correlated with soil samples collected from hollow-stem auger borings, and (2) construction of groundwater monitoring wells using mud rotary drilling and downhole geophysical logging. Mr. Pender developed the monitoring wells and collected

groundwater samples. Mr. Pender was subsequently involved in preparing geologic cross-sections, assembling the analytical results, and writing the project reports.

Field Geologist, Geotechnical Engineering Investigation, Biola, CA, Private Client, T&M, 2004, \$5K: Mr. Pender served as a field geologist performing the soil sampling and borehole logging in support of the preparation of a geotechnical investigation report regarding a prospective location for a new aboveground storage tank at an agricultural chemical facility.

Geologist, Proposed Todd Beamer Park Geotechnical Study, Fresno, CA, Beals Alliance, Inc, Lump Sum, 2006-2007, \$11K: As Geologist, Mr. Pender was responsible for the geotechnical investigation of an 8 acre site. Efforts included assessment of the geologic conditions of the site, developing the geotechnical boring plan, oversight and direction of drilling and soil sample collection.

Contaminant Geology

Field Task Manager and Geologist, Goshen Avenue and Shirk Road, Visalia, CA, Confidential Industrial Client, T&M, 2003-2013, \$1.2 M: Mr. Pender has served and continues to serve as the Field Task Manager and Geologist for a remedial investigation and remedial action program subject to review by the California DTSC at this site encompassing a fastener manufacturing and adjoining industrial plant. A chlorinated solvent plume extends approximately 1-mile off-site. Mr. Pender oversees various field tasks and prepares various quarterly and annual reports. He oversees operations and maintenance, sampling and monitoring of the pump-and-treat groundwater remediation system, monitoring wells and water supply wells. Treated groundwater is discharged to an irrigation canal under an NPDES permit. Mr. Pender served as field geologist for various phases of a complex groundwater investigation involving mud rotary drilling, downhole geophysical logging, collection of depth-discrete soil and groundwater samples using Simulprobe equipment, and installation of nested groundwater monitoring wells. Mr. Pender was the field geologist for an investigation using a cone penetrometer testing (CPT) rig to gather information used in the planning of new off-site remediation wells. Mr. Pender oversaw the destruction of several monitoring wells on site.

Geologist, Site Characterization and Groundwater Monitoring, Firebaugh, CA, Private Commercial Client, T&M, 2005-2012, \$1.2M: Mr. Pender was involved in the site characterization and groundwater monitoring and remediation programs. Mr Pender was responsible for contractor selection and oversaw site soil and groundwater characterization activities utilizing direct push drilling technology while lithologically logging the boreholes and oversaw the installation of a monitoring well. Mr. Pender oversaw the installation of a high-vacuum,

dual phase extraction system to remove floating product, and subsequently oversaw the installation of a long-term remediation system utilizing *in-situ* ozone and hydrogen peroxide injection in order to complete site remediation. This system included eight dual-completion injection wells and a vapor recovery trench to prevent fugitive ozone from impacting the site's dispenser island. The lead oversight agency was the California Regional Water Quality Control Board – Central Valley Region. The work was financed by the California UST Cleanup Fund. Mr. Pender has obtained numerous permits from the city engineering department and Caltrans right of way intrusion permits for ongoing work at the site. He performed groundwater monitoring, and prepared quarterly groundwater monitoring reports, including producing potentiometric surface and contaminant concentration contour maps. Mr. Pender was also involved in air monitoring activities in support of characterizing impacts to neighboring residential properties. Mr. Pender also retained a contractor and oversaw the destruction of monitoring wells on site upon site closure.

Geologist, Gill Ranch Storage Facility, Gas Leak Detection Monitoring, Madera County, CA, Gill Ranch Storage, LLC, T&M, 2010-Present, Cost: \$80K. The Gill Ranch Storage Facility project utilizes the 5,020-acre Gill Ranch depleted gas field to store natural gas transported through a new 30-inch natural gas pipeline connecting with the Pacific Gas and Electric Company's high pressure backbone system near the Interstate-5 corridor. The objective of the Leak Detection monitoring is to assess the level of natural gas near the ground surface, if any, during storage injection operations. Monitoring is performed using soil gas monitoring wells and temporary probes for comparison with the Baseline Leak Detection monitoring results in order to satisfy project and California Public Utilities Commission (CPUC) data requirements for monitoring any soil gas underlying the gas storage facility. Sampling is conducted pursuant to the Gill Ranch Storage Facility Gas Monitoring Plan and in accordance with the current Department of Toxic Substances Control (DTSC) *Advisory - Active Soil Gas Investigations* that incorporates the Regional Water Quality Control Board, Los Angeles Region (LARWQCB) *Interim Guidance for Active Soil Gas Investigation*.

Geologist, Groundwater Contamination Assessment, Hazardous Waste Site, Merced, CA, City of Merced, T&M, 2009, \$275K: Mr. Pender provided construction oversight during the installation and development of five groundwater monitoring wells at this site that penetrate semi-confined and confined aquifers. Mr. Pender also performed periodic groundwater monitoring and compiled quarterly reports.

Geologist, South Fresno PCE Plume, Fresno, CA, California Department of Toxic Substances Control, T&M, 2008 - Present, \$250K: Mr. Pender served as a field geologist for this investigation to assess potential sources of tetrachloroethene (PCE) that has been detected in groundwater within the study area. A two-phase passive soil gas survey using Goresorber modules was conducted. The first phase used a relatively large sampling interval and identified a likely PCE source area.

The second phase used a tighter sampling interval and identified a single facility that appears to be the most likely source of the PCE. A historical records search revealed that the facility had been a laundry-supply business in the 1960s. Active soil gas sampling with an on-site mobile laboratory was used to assess actual shallow soil-gas volatile organic compound (VOC) concentrations in two phases. Cone Penetration Test (CPT) equipment was used to assess the lithology within the study area and to collect groundwater samples to depths of over 100 feet. URS also collected subslab soil gas samples and indoor-air samples at the suspect facility to evaluate risks to occupants.

Geologist, PCE Plume, Bakersfield, CA, California Department of Toxic Substances Control, T&M, 2012, \$50K: Mr. Pender served as a field geologist for this investigation to assess potential sources of tetrachloroethene (PCE) that has been detected in groundwater within the study area. A two-phase passive soil gas survey using Goresorber modules was conducted. The first phase used a relatively large sampling interval and identified a likely PCE source area. The second phase used a tighter sampling interval and identified a single facility that appears to be the most likely source of the PCE. Active soil gas sampling with an on-site mobile laboratory was used to assess actual shallow soil-gas volatile organic compound (VOC) concentrations in two phases

Geologist, PCE Groundwater Investigation and Remediation, Turlock, CA, City of Turlock, T&M, 2009-2010, \$332K: Mr. Pender conducted cone penetrometer test (CPT) borings and collected depth discrete groundwater samples to further delineate a tetrachloroethylene (PCE) plume in groundwater. He also observed and directed the installation of several groundwater monitoring wells and a groundwater extraction well for a pump and treat system. He directed the aquifer performance tests for the pump and treat system design. Mr. Pender also assisted with the preparation of reports and figures detailing the results of field activities.

Field Geologist, Phase I Soil RFI, Oakley, CA, DuPont, T&M, 2005, \$234K: Mr. Pender served as a field geologist for this Phase I RFI, collecting soil samples using direct push drilling equipment. Field work was conducted in Modified Level C PPE, including a full-face respirator, due to concerns regarding high concentrations of contaminants in soil.

Field Geologist, Osage Industries Preliminary Endangerment Assessment, Kern County, CA, California Department of Toxic Substances Control, T&M, 2004, \$75: Mr. Pender served as a field geologist, collecting numerous soil samples using hand auger equipment. Field work was conducted in Modified Level C PPE, including a full-face respirator, due to concerns regarding high concentrations of heavy metals in the soil. Mr. Pender was responsible for logging geologic conditions as well as assembling the analytical results and writing the project report.

Field Geologist, Preliminary Endangerment Assessment, Rosamond, CA, Department of Toxic Substances Control,

T&M, 2005, \$110K: Mr. Pender served as a field geologist and was responsible for collecting soil samples using hand auger equipment. Mr. Pender was responsible for logging geologic conditions as well as assembling the analytical results and writing the project report.

Field Geologist, Site Characterization and Groundwater Monitoring, San Jose, Salinas and Hayward, CA, J.C. Penney Co.,

T&M, 2003-2013, \$875K: Mr. Pender is actively involved in site characterization and groundwater monitoring programs. He has installed and retrieved passive soil gas sample probes. He periodically performs groundwater monitoring involving measuring depth to groundwater, purging monitoring wells with an electric submersible pump or a bailer, sampling the wells, packaging samples for shipment to the laboratory, and preparing the quarterly groundwater monitoring reports, including producing potentiometric surface and contaminant concentration contour maps. He also arranges for disposal of the purged groundwater as necessary and has overseen the destruction of monitoring wells.

Geologist, Former Etcheverry Market UST Site, Madera, CA,

T&M, 2011-Present, Cost: \$156K. The Former Etcheverry Mkt site, currently Farmer's Market, is an active grocery store and retail gasoline station located in Madera, Madera County. The soil and shallow groundwater beneath the station has been impacted by gasoline that leaked from the station's piping (since replaced with modern, double-wall equipment). URS has characterized the contaminant plume and implemented an interim remediation program utilizing high-vacuum extraction to remove soil vapor (SVE). The lead oversight agency is the California Regional Water Quality Control Board – Central Valley Region. The work is being financed by the California UST Cleanup Fund.

Field Geologist, Groundwater Monitoring Program, Visalia, CA,

Visalia Village Dry Cleaners, T&M, 2004-2006, \$50K: Mr. Pender was responsible for groundwater monitoring efforts for this program. He performed groundwater monitoring involving measuring depth to groundwater, purging wells with an electric submersible pump or a bailer, sampling the wells, packaging samples for shipment to the laboratory, and preparing the quarterly groundwater monitoring reports, including producing potentiometric surface and contaminant concentration contour maps.

Field Geologist, Sunnyside Country Club Village Dry Cleaners, Fresno, CA, Private Commercial Client, T&M, 2004-2005, \$88K:

Mr. Pender served as field geologist for a soil investigation involving direct-push borings. Soil and soil gas samples were collected and analyzed in an on-site mobile laboratory. Mr. Pender also drafted the workplan and report for the investigation. Mr. Pender also performed groundwater monitoring procedures including sampling of wells, measuring depth to groundwater, and purging wells with an electric submersible pump or bailer. He also prepared the quarterly groundwater monitoring reports, which included producing potentiometric surface and contaminant concentration contour maps.

Geologist, Groundwater Monitoring Program, Fresno County, CA, Fresno County Landfills, FFP, 2006-2008, \$50K: Mr. Pender was responsible for producing potentiometric surface contour maps for four landfills in Fresno County. Mr. Pender also produced tables and graphs displaying field parameter and analytical results from quarterly groundwater sampling in support of the quarterly detection monitoring reports.

Field Geologist, Groundwater Monitoring Program, Fresno Battery Exchange, Fresno, CA and HS Mann, Del Rey, CA, Department of Toxic Substances Control, T&M, 2003-2006, \$300K: For these sites where soil has been contaminated with extremely high concentrations of lead, Mr. Pender was involved in the groundwater monitoring programs. He periodically performed groundwater monitoring involving measuring depth to groundwater, purging wells with an electric submersible pump, sampling the wells, packaging samples for shipment to the laboratory, and preparing the quarterly groundwater monitoring reports, including producing potentiometric surface and contaminant concentration contour maps.

Field Geologist, Field Investigation, Fresno, CA, Cox, Castle & Nicholson, LLP, T&M, 2005, \$130K: At this former crop-dusting airfield, Mr. Pender was a field geologist for an investigation to assess the extent of pesticide-contaminated soils using hand auger equipment. Fieldwork was conducted in Modified Level C PPE, due to concerns regarding high concentrations of contaminants in soil. Mr. Pender later performed field oversight, dust monitoring and confirmation sampling during the removal of contaminated soils.

Field Geologist, Site Characterization and Groundwater Monitoring, Earlimart, CA, Baldwin Ranch, T&M, 2004-2008, \$50K: Mr. Pender served as field geologist and performed groundwater monitoring which involved measuring the depth to groundwater, purging monitoring wells with an electric submersible pump or a bailer, sampling the wells, and preparing the quarterly groundwater monitoring reports, including producing potentiometric surface and contaminant concentration contour maps. Mr. Pender also directed CPT and ROST explorations at the site.

Field Geologist, Groundwater Monitoring Program, Glennville, CA, Regional Water Quality Control Board, T&M, 2004-2007, \$81K: Mr. Pender was actively involved in the site groundwater monitoring programs, characterizing contaminant fate and transport in a fractured bedrock aquifer system. He periodically performed groundwater monitoring involving measuring depth to groundwater, purging monitoring wells with an electric submersible pump or a bailer, sampling the wells, and packaging samples for shipment to the laboratory. He prepared the quarterly groundwater monitoring reports, including producing potentiometric surface and contaminant concentration contour maps.

Field Geologist, Burlington Northern, Santa Fe Railroad UST, Corcoran, CA, Regional Water Quality Control Board, T&M, 2005, \$34K:

Mr. Pender was involved in the site characterization and groundwater monitoring programs. He periodically performed groundwater monitoring involving measuring depth to groundwater, purging monitoring wells with an electric submersible pump or a bailer, sampling the wells, packaging samples for shipment to the laboratory. Mr. Pender also oversaw the closure of the on-site monitoring wells.

Field Geologist, Rhodes Inc. Leaking UST Site, Reedley, CA, Regional Water Quality Control Board, T&M, 2005-2008, \$1.2M:

Mr. Pender served as a geologist and was responsible for compiling several workplans, reports and necessary permitting for field work. Mr. Pender was also responsible for contractor oversight during site characterization activities including drilling and sampling of exploration borings and construction of four monitoring wells. He managed and directed the field work to implement a RAP that included the installation of additional groundwater monitoring wells, additional SVE wells, and air sparge injection points. He has periodically performed quarterly groundwater monitoring, prepared quarterly reports, and conducted operations and maintenance (O&M) on the thermal/electric catalytic oxidizer soil vapor extraction (SVE) unit installed to remediate the hydrocarbon impacted site.

Field Geologist, Chevron Signal Brown Lease, Santa Maria, CA, Chevron Corporation, T&M, 2007-2008, \$420K:

Mr. Pender was involved in the characterization of soils impacted by petroleum hydrocarbons affected by leaking tank batteries and pipelines, sumps used during well drilling and operations, and oil-sand lease roads. Mr. Pender was responsible for contractor oversight, logging boreholes and collecting samples, logging test pits. Mr. Pender was involved in writing the Site Assessment Workplan and often trained new staff in field techniques.

Field Geologist, Chevron Signal Hopkins and Wiley Leases, Santa Maria, CA, Chevron Corporation, T&M, 2007-2008 \$685K:

Mr. Pender served as a field geologist and prepared a Site Assessment Report and a Remedial Action Plan for the investigation/remediation of the site. Mr. Pender also was involved in oversight and confirmation sampling of the excavation and other remediation activities.

Field Geologist, UST Removal, Kaiser Permanente Hospital, Oakland, CA, City of Oakland Fire Department, T&M, 2007, \$118K:

Mr. Pender was responsible for contractor oversight, confirmation sampling and interaction with regulatory oversight during the removal of two 50,000 gallon USTs.

Field Technician, Stormwater Runoff Monitoring, United States Postal Service, Fresno and Bakersfield, CA, 2003-2006: Supported stormwater monitoring program for five USPS locations. Collected stormwater runoff samples during/following precipitation events in

support of characterization of runoff from fueling areas at USPS locations in the central valley of California.

Geologist, Environmental Site Assessments, Central California, California High Speed Rail Authority, T&M, 2009-2011, \$5M: Mr. Pender was responsible for visiting sites of environmental concern to conduct Phase I Environmental Site assessments in support of planning and permitting phase of the California High Speed Rail Project in locations throughout the central valley of California.

Geologist, Environmental Site Assessments, Central California, Verizon Wireless, FFP, 2009-2011: Mr. Pender was responsible for visiting potential cellular tower construction sites to conduct Phase I & II Environmental Site assessments in support of planning and permitting in many locations throughout central California.

K-12 School Site Hazardous Material Investigations

Geologist, Preliminary Environmental Assessment (PEA), Island Elementary School, Lemoore, CA, DTSC, 2012, \$55K: Mr. Pender was a geologist for the PEA of an existing elementary school site that was proposed for addition and expansion. The PEA was conducted on behalf of the Island Union Elementary School District under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the PEA Workplan had to be approved by USEPA as well as DTSC. At the time of the PEA, the site had been an elementary school for over 50 years. Previous uses consisted of agricultural cropland. Soil samples were collected to address potential lead and termiticide contamination near existing buildings, and potential pesticide contamination in former cropland areas. In addition, an alternate assessment of one portion of former cropland was performed using the Incremental Sampling Methodology (ISM). Elevated concentrations of lead and chlordane were identified near some of the buildings. Due to careful conservation of project budget, URS was able to perform stepout/stepdown soil sampling to assess the lateral and vertical extents of impacted soil near these buildings. The PEA was completed under budget and within a very short time period to meet the USEPA grant deadline.

Geologist, Preliminary Environmental Assessment (PEA), Jefferson School, Tracy, CA, DTSC, 2012, \$50K: Mr. Pender was a geologist for the PEA of an existing elementary school site that was proposed for extensive renovation. The PEA was conducted on behalf of the Jefferson Union Elementary School District under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the PEA Workplan had to be approved by USEPA as well as DTSC. At the time of the PEA, the site had been a school for over 50 years. Previous

uses consisted of agricultural cropland. Soil samples were collected to address potential lead and termiticide contamination near existing buildings, and potential pesticide contamination in former cropland areas. Elevated concentrations of lead and chlordane were identified near some of the buildings. Due to careful conservation of project budget, URS was able to perform stepout/stepdown soil sampling to assess the lateral and vertical extents of impacted soil near these buildings. The PEA was completed under budget and within a very short time period to meet the USEPA grant deadline.

Geologist, Preliminary Environmental Assessment (PEA), Planned Continuation High School Site, Santa Maria, CA, DTSC, T&M, 2012, \$45K: Mr. Pender was a geologist for the PEA of a proposed continuation high school site. The PEA was conducted on behalf of the Santa Maria Joint Union High School District under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the PEA Workplan had to be approved by USEPA as well as DTSC. At the time of the PEA, the site consisted of a recreational vehicle (RV) campground and vacant land that had recently received imported fill. A nearby burn dump was also of concern. Soil samples were collected in areas of concern, and soil gas samples were collected to evaluate the nearby burn dump. The assessment of the vacant land with import fill was accomplished using the Incremental Sampling Methodology (ISM). The Johnson & Ettinger model was used to evaluate the detected soil gas concentrations. Elevated concentrations of lead and chlordane were identified in soil on one side of the main campground building. The PEA was completed under budget and within a very short time period to meet the USEPA grant deadline.

Geologist, Preliminary Environmental Assessment (PEA), Reconstruction of Mary Chapa and El Camino Real Schools, Greenfield, CA, DTSC, T&M, 2012, \$75K: Mr. Pender was a geologist for the PEA of two existing adjacent school sites that are proposed for demolition and reconstruction of a single school. The PEA was conducted on behalf of the Greenfield Union School District under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the PEA Workplan had to be approved by USEPA as well as DTSC. The site included a transportation building with a bus wash rack, a hazardous waste storage area, an aboveground fuel storage tank, and a former underground storage tank (UST). Soil samples were collected in areas of concern, and soil gas samples were collected to evaluate the former UST. The Johnson & Ettinger model was used to evaluate the detected soil gas concentrations. Elevated concentrations of lead and PAHs were identified in soil near the hazardous-waste storage area, and elevated concentrations of dieldrin and chlordane were detected in soil near three of the existing school buildings. The PEA was

completed under budget and within a very short time period to meet the USEPA grant deadline

Geologist, Phase I Environmental Site Assessment (ESA), Preliminary Environmental Assessment (PEA), Supplemental Site Investigation (SSI), Removal Action and Geological/Environmental Hazards Report, Violet Heintz Education Academy, Fresno, CA, Fresno County Office of Education, 2010 - 2012, \$100K: Mr. Pender was a geologist for the hazardous-materials evaluation of an existing continuation high school site with one main building. Soil samples around the building identified high levels of chlordane used to kill termites. In addition, a few petroleum hydrocarbon compounds were detected in soil gas near a former underground storage tank (UST). URS was able to use risk-assessment arguments to eliminate the UST from further consideration. Additional soil sampling was performed that identified hot-spot areas of soil contamination. Statistical analysis was used to show that removal of these hot spots would reduce the overall cancer risk to acceptable levels. The total volume of soil needing removal was small enough that DTSC agreed that a Removal Action Workplan (RAW) would not be required. URS staff surgically removed the hot-spot areas and backfilled with clean, imported fill. The final report was quickly approved by DTSC, and the site received unrestricted approval for school usage. Mr. Pender also prepared environmental and geological hazards reports.

Geologist, Phase I Environmental Site Assessments (ESAs), Phase II ESA, Preliminary Environmental Assessments (PEA), Supplemental Site Investigation (SSI), Removal Action Workplan (RAW), RAW-Implementation Support, and Geological/Environmental Hazards Report, Planned Southwest Middle School Site, Fresno, CA, Fresno Unified School District, 2008 - Present, \$260K: Mr. was a geologist for the hazardous-materials evaluation for a new middle school site. Phase I ESAs were performed for four alternative sites, and the conclusions were factored into the school district's decision on which sites to proceed with. A Phase II ESA involving passive soil gas sampling, active soil gas sampling, and soil-matrix sampling was performed for one of the sites. URS began a PEA for a second site, but stopped when the client decided to eliminate the site from further consideration. URS also conducted an air toxics health risk assessment and odor evaluation of several nearby industrial facilities. URS then performed a PEA for a third site, which identified lead and chlordane in soil around existing buildings as contaminants of concern. An SSI was performed to assess the lateral and vertical extents of impact, and a RAW was prepared to address the impacted areas. All project documents were expeditiously approved by DTSC. URS assisted the client with bidding plans and specifications to select a remediation contractor, and URS is currently assisting the client with oversight of the removal action. A geological/environmental hazards report was also prepared for this third site. All work was completed on very tight schedules due to the client's very aggressive construction schedule.

Geologist, Preliminary Environmental Assessment (PEA), Planned Charter High School Site, Tracy, CA, DTSC, T&M, 2011, \$25K: Mr. was a geologist for the PEA of a proposed 25-acre charter high school site. The PEA was conducted on behalf of the Tracy Unified School District under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the PEA Workplan had to be approved by USEPA as well as DTSC. At the time of the PEA, the site consisted of agricultural cropland bordered by an irrigation tailwater collection pond. Surface and subsurface soil samples were collected at 35 on-site locations and analyzed for arsenic and organochlorine pesticides (OCP). Arsenic concentrations were found to be within background levels, and detected OCP concentrations were not high enough to be of significant concern. The PEA was completed significantly under budget and within a very short time period to meet the USEPA grant deadline.

Geologist, Preliminary Environmental Assessment (PEA) and Geological/Environmental Hazards Report, Planned Fowler High School Expansion, Fowler, CA, Fowler Unified School District, 2011, \$25K: Mr. Pender was a geologist for the PEA and geological/environmental hazards assessment of a planned alternative-education school site east of Fowler High School. At the time of the PEA, the site consisted of agricultural cropland. Surface and subsurface soil samples were collected at several on-site locations and analyzed for arsenic, copper, polychlorinated biphenyls (PCBs), and organochlorine pesticides (OCP). Detected chemical concentrations were not high enough to be of significant concern. A geological/environmental hazards report was also prepared for the site – no significant concerns were identified. All reports were quickly approved by the relevant agencies.

Geologist, Supplemental Site Investigation (SSI), Planned Fourth Middle School Site, Brentwood, CA, DTSC, T&M, 2011, \$30K: Mr. was a geologist for the SSI of a proposed 19-acre middle school site. The SSI was conducted on behalf of the Brentwood Union School District under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the SSI Workplan had to be approved by USEPA as well as DTSC. At the time of the SSI, the site consisted of agricultural cropland with two farmsteads, each having a house and a barn. A previous PEA had identified elevated concentrations of lead and chlordane adjacent to some of the structures. Surface and subsurface soil samples were collected at numerous on-site locations and analyzed for lead and organochlorine pesticides (OCP). The lateral and vertical extents of contaminated soil were assessed within the project constraints. The SSI was completed significantly under budget and within a very short time period to meet the USEPA grant deadline.

Geologist, Preliminary Environmental Assessment (PEA), Supplemental Site Investigation (SSI), and Removal Action,

Planned Valentine Elementary School Site, Fresno, CA, DTSC and Central Unified School District, T&M, 2006 - 2011, \$120K: Mr.

Pender was a geologist for the hazardous-materials evaluation of a proposed elementary school site. The PEA was conducted on behalf of the Central Unified School District (CUSD) under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the PEA Workplan had to be approved by USEPA as well as DTSC. At the time of the PEA, the site consisted of three contiguous residential properties that were previously rural, but had been annexed into the City of Fresno and were surrounded by recently constructed residential subdivisions and apartments. Each property had its own water well and septic system. Direct-push technology methods were employed to collect soil and soil gas samples. An on-site laboratory was used for soil gas analyses to provide for same-day analytical results and to allow adjustment of the sampling program for site-specific conditions, to ensure a complete site investigation, and to minimize the need for subsequent sampling events. The Johnson and Ettinger soil-vapor intrusion model was used to evaluate potential risks to receptors inside on-site structures. The PEA identified several areas of the site having soil impacted by chlordane (a termiticide), lead (from lead-based paint), and a few other chemicals. The PEA report concluded that a further response action was necessary, and DTSC concurred. The PEA was completed under budget and within a very short time period to meet the USEPA grant deadline. URS conducted an SSI for the site under contract to the CUSD. Both the SSI Workplan and the SSI Report were quickly approved by DTSC without any requests for revisions. URS then prepared a Removal Action Workplan (RAW) that was quickly approved by DTSC. URS assisted the school district with implementing the RAW. URS prepared bidding plans and specifications that the school district used to hire a remediation contractor. URS assisted the district in the bidding process, provided oversight of the removal action on behalf of the district, and prepared a Removal Action Completion Report (RACR) that was quickly approved by DTSC.

Geologist, Phase I Environmental Site Assessment (ESA), Preliminary Environmental Assessment (PEA), Supplemental Site Investigation (SSI), Removal Action Workplan (RAW), Livingston High School Expansion Site, Livingston, CA, Merced Union High School District, T&M, 2005 - 2009, \$90K: Mr.

Pender was a geologist for environmental assessment of a 19-acre proposed high school expansion site. Upon URS's advice, the school district elected to incorporate the Phase I ESA process into the PEA Workplan development in order to save time and money. The site had been used as cropland, and one area was used for farm equipment maintenance and storage. Soil samples were collected across the site, and a surface water sample was collected from a canal that traverses the site. A few relatively small on-site areas were identified that had soil impacted by petroleum hydrocarbons due to the equipment maintenance activities. The PEA concluded that 16 acres of the site were safe for students but 3 acres

required further assessment. URS assisted the school district in getting partial DTSC site approval for the majority of the site, so that the district could qualify to receive state funding sooner. URS completed an SSI of the smaller portion, and was successful in using risk assessment arguments to eliminate the largest impacted area from further action, thereby saving the district a substantial amount of money. URS prepared a RAW that was expeditiously approved by DTSC. URS then prepared bidding plans and specifications, which the school district used to procure a remediation contractor. URS provided full oversight of the dig-and-haul remediation work, including delineation of remediation areas, contractor interaction, field documentation, real-time air monitoring to protect on-site workers and off-site receptors, and confirmation soil sampling. Following the remediation work, URS prepared a final technical report, which again was quickly approved by DTSC.

Geologist, Preliminary Environmental Assessment (PEA), Supplemental Site Investigation (SSI), Removal Action, Planned Zumwalt Avenue Elementary School Site, Reedley, CA, Kings Canyon Unified School District, 2006 - 2008, \$160K: Mr. Pender was a geologist for environmental assessment of a proposed 20-acre elementary school site located on a nectarine orchard and farmstead. The farmstead included a pesticide storage shed, suspected mixing area, a garbage burn pile, and potential treated wood structures. The PEA was successfully conducted on a fast-track basis to meet a grant funding and construction deadline. The PEA concluded that 95% of the site was safe for students but 5% required further assessment. URS assisted the school district in getting partial DTSC site approval for the majority of the site, so that construction could move forward on a very aggressive schedule. URS conducted an SSI of the smaller portion, and prepared a RAW that was quickly approved by DTSC. URS implemented the RAW and prepared a Removal Action Completion Report that was quickly approved by DTSC. URS also conducted a risk analysis study of nearby aboveground fuel storage tanks, as required by California Code of Regulations, Title 5, Section 14010(h). The study presented recommendations for mitigating the risks due to the tanks. URS also conducted an air toxics health risk assessment, as required by California Education Code Section 17213(b). The assessment concluded that the toxic air emissions from a nearby manufacturing facility were not likely to significantly endanger the health of school students or staff.

Geologist, Preliminary Environmental Assessment (PEA), Supplemental Site Investigation (SSI), Removal Action, Chowchilla High School Site, Chowchilla, CA, Chowchilla Unified School District, T&M, 2006-2012, \$84K: Mr. Pender was a geologist for environmental assessment of a proposed 20-acre elementary school site located on a nectarine orchard and farmstead. The farmstead included a pesticide storage shed, suspected mixing area, a garbage burn pile, and potential treated wood structures. The PEA was successfully conducted on a fast-track basis to meet a grant funding and construction deadline.

The PEA concluded that 95% of the site was safe for students but 5% required further assessment. URS assisted the school district in getting partial DTSC site approval for the majority of the site, so that construction could move forward on a very aggressive schedule. URS conducted an SSI of the smaller portion, and prepared a RAW that was quickly approved by DTSC. URS implemented the RAW and prepared a Removal Action Completion Report that was quickly approved by DTSC. URS also conducted a risk analysis study of nearby aboveground fuel storage tanks, as required by California Code of Regulations, Title 5, Section 14010(h). The study presented recommendations for mitigating the risks due to the tanks. URS also conducted an air toxics health risk assessment, as required by California Education Code Section 17213(b). The assessment concluded that the toxic air emissions from a nearby manufacturing facility were not likely to significantly endanger the health of school students or staff.

Geologist, Removal Action Workplan (RAW), and RAW Implementation, Oakdale High School Expansion Site, Oakdale, CA, Oakdale Joint Unified School District, T&M, 2003 - 2005,

\$250K: Mr. Pender was a geologist for assessment and remediation of this planned school expansion site which included 30 residences and formerly had been used as cropland. The PEA included collection of soil, soil-vapor, and groundwater samples. Soil-vapor samples were analyzed by an on-site laboratory, and the remaining samples were analyzed by fixed laboratories. The PEA identified on-site areas having elevated concentrations of lead and chlordane in soil. The SSI assessed the lateral and vertical extents of contamination. A RAW was prepared for removal of the contaminated soil. Mr. performed air monitoring and confirmation soil sampling during the removal action.

Geologist, Preliminary Environmental Assessment (PEA), Planned Mendota Junior High School Site, Mendota, CA, DTSC, T&M, 2006, \$55K: Mr. Pender was a geologist for the PEA of a proposed junior high school site. The PEA was conducted on behalf of the Mendota Unified School District under DTSC's Targeted Site Investigation (TSI) Program, so that DTSC was actually URS's client. The funding for the project came from the U.S. Environmental Protection Agency (USEPA) brownfields assessment program, which meant that the PEA Workplan had to be approved by USEPA as well as DTSC. At the time of the PEA, the site consisted of fallow cropland. Several leaking fuel facilities were located near the site, and transport of contaminated groundwater from those facilities to the site was a concern. Direct-push technology methods were employed to collect soil, soil gas, and groundwater samples. An on-site laboratory was used for soil gas analyses to provide for same-day analytical results and to allow adjustment of the sampling program for site-specific conditions, to ensure a complete site investigation, and to minimize the need for subsequent sampling events. The PEA report concluded that no further action was necessary, and DTSC concurred. The PEA was completed under budget and within a very short time period to meet the USEPA grant deadline.

FEMA Disaster Assistance

Project Officer, FEMA Public Assistance Program, Hurricanes Frances, Jeanne, and Charlie, Florida, 2004-2005: For this ninety-day assignment in central Florida, Mr. Pender was a Project Officer, assessing storm-related damages and expenses as a result of the hurricanes that struck the state in 2004. This included preparing damage descriptions, preparing scopes of work to repair these damages, as well as estimating the total cost for these scopes of work and costs arising from providing emergency protective measures to the public. This work was done in support of various county and city government agencies, as well as private non-profit companies.

Project Officer, FEMA Public Assistance program, Hurricane Wilma, Florida, 2005-2006: For this ninety-day assignment in south Florida, Mr. Pender was a Project Officer, assessing storm-related damages and expenses as a result Hurricane Wilma that struck the state in 2005. This included preparing damage descriptions, preparing scopes of work to repair these damages, as well as estimating the total cost for these scopes of work and costs arising from providing emergency protective measures to the public. This work was done in support of various county and city government agencies.
